SAVANT PRO APP

The Savant Pro App enables all the features of a Savant Home, with fast access to rooms, scenes, services and much more.

Swipe right or tap **System** to get the status of devices within your Savant Home.

Swipe left or tap here to see all available **Scenes**.

Pull down or tap here for the **Rooms View** to access rooms, profiles, and settings.

To get a closer look at what's **Now Playing** in your home, tap your activity feed.

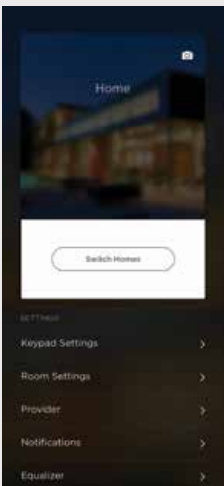

Scroll left or right through the carousel of available services in your Savant Home.

A service that is active somewhere in the home is indicated by a dot.

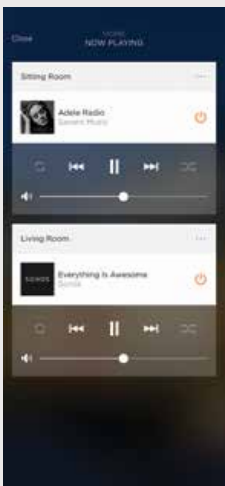

Tap to access all of the options for a service. For quick adjustments press and hold or Force Touch to bring up **Quick Controls**.

ROOMS VIEW

The Rooms View displays every available service in each room.

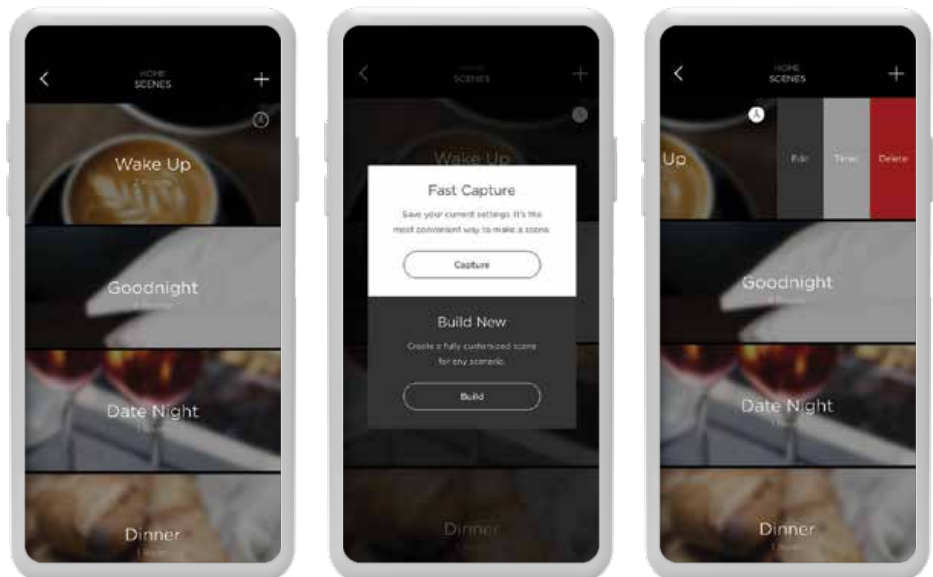

To adjust a service for the room, tap to access all its features, or press and hold the icon to bring up **Quick Controls**.

Pull down or tap here to return to the **Home View**.

Tap on a room to display the **Room View**. From there, swipe left or right to see the Scenes and devices associated with that room.

POWER OF SCENES

Capturing, creating, and editing Scenes is easier than ever.

Tap the **+** icon to capture or build a Scene. Each step has been designed for simplicity.

Swipe left on a **Scene** name to edit, set a countdown timer, or delete.

Scenes can be set as shared or left as personal. Shared Scenes are available to all users as well as accessible from in-wall touch screens.

Press and Hold or Force Touch on iOS to reorder Scenes.

SAVANT MUSIC

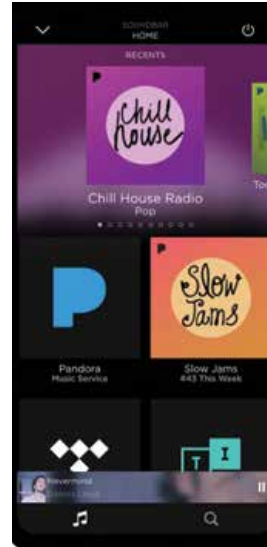

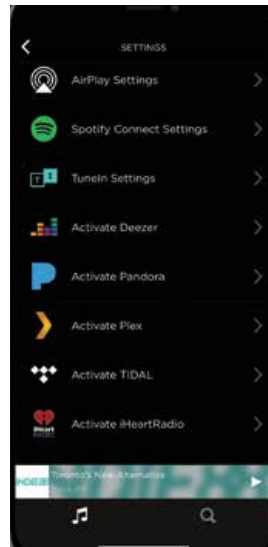

A collection of premium streaming services to make every moment just right.

The **Global Now Playing** screen shows all active audio/video services, and allows you to control the volume in each room.

Tapping the **...** Icon on the Global Now Playing screen brings up the **Distribution** screen, which lets you play audio/video in additional rooms.

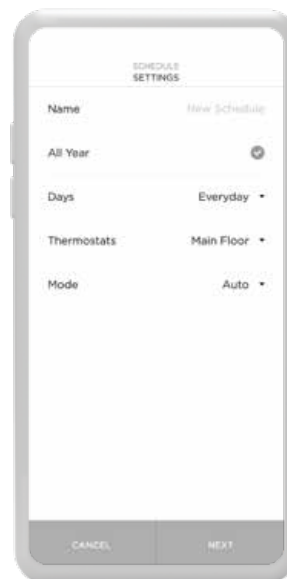

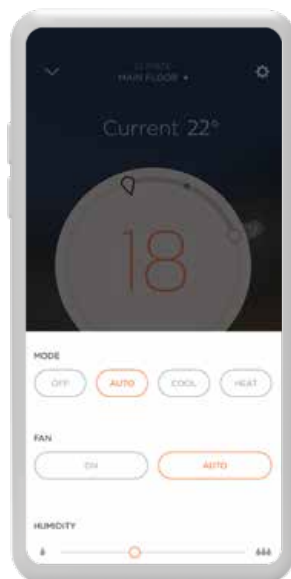

To see what's playing next or edit the music in your queue, tap the **Icon** on the Now Playing screen.

Press and Hold the power button to setup a sleep timer.

CLIMATE

Climate control in the Savant Pro App allows for instant control of rooms, as well as scheduling.

There are three climate modes. In Heat or Cool mode, simply use the sliders or arrows to set the temperature you want. In Auto mode, use the sliders to set an appropriate temperature range. Tap the **Settings Icon** to change modes.

Tap the **Calendar Icon** to put your climate on a schedule—your home can start warming every day at 6am, or cool off in the evening.

To temporarily override a schedule, press and hold the climate control circle to bring up a **Hold Temperature menu**.

USER PROFILES

Let everyone in your house enjoy the benefits of Savant.

The **Profiles** screen shows a list of who can use your Savant Home.

Add a new profile by tapping the **+** icon and choosing from three different user types.

After inviting someone to your Home, tap on the new user profile to grant permission for **Control** of different rooms, services, or the ability to access your home remotely.

SECURITY

Savant Pro supports most popular security platforms.

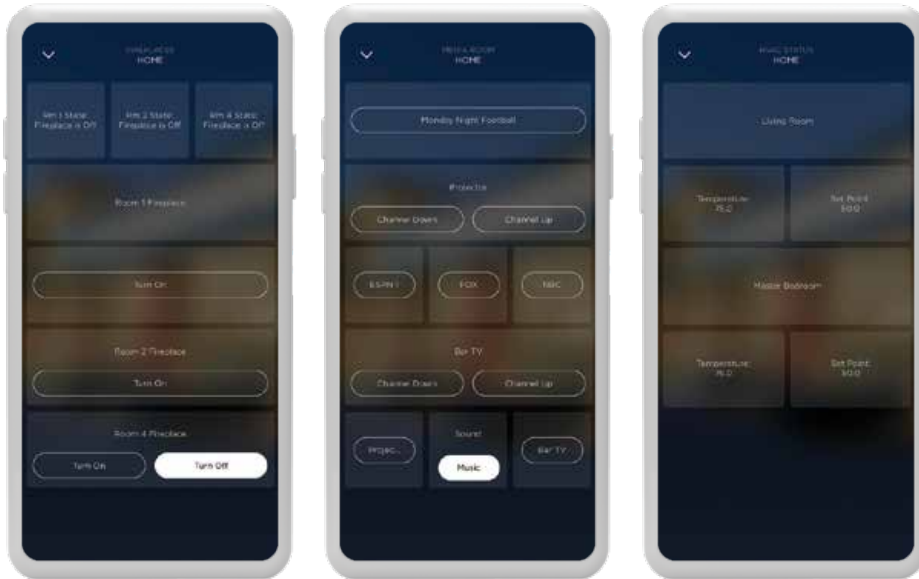

The buttons mimic your in-wall keypad so you can set your alarm from anywhere.

See the status of every sensor in your home at a glance.

Security cameras let you keep an eye on things when you're away.

CUSTOM SCREENS

Speak to your Integrator about custom screen options.

Custom screens can be added to your Savant Pro App by your Authorised Savant Integrator.

Options include buttons for common activities that cannot be created in a Scene or to display status information for devices in your home.

APPLE WATCH

Merging the most sophisticated features with the greatest level of convenience.

Control and status has never been more convenient with the Savant Apple Watch app.

Capture the perfect moment and then save it as a **Savant Scene**. Use the Savant Apple Watch App to turn on and off any Savant Scenes, or only those that you frequently use.

Create **Notifications** to alert you to important status changes in your home, and then take action immediately and easily.

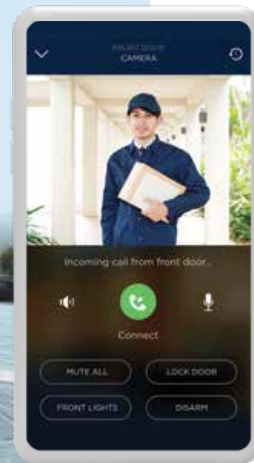

SAVANT ENTRY SERVICES

Eyes, Ears & Voice at Your Doorstep

Introducing connected entry for your Savant home with the most advanced entry solution available, including a wide-angle camera with video capture plus two-way intercom. Savant door stations make communicating and controlling your entry points simple and accessible.

Features

- Video recording for later viewing
- Five assignable ringtones
- Answer, see, and speak to visitors from anywhere
- Customisable user interface in Savant Pro App
- Notifications for events such as visitors or motion
- Includes night vision camera

Answer From Anywhere

Be notified instantly when someone is at your door with an audio and video feed from the door entry station, regardless of where you are. Answer to start the two way intercom, and unlock the door, turn on the lights or activate a Savant Scene.

On-Demand Video History

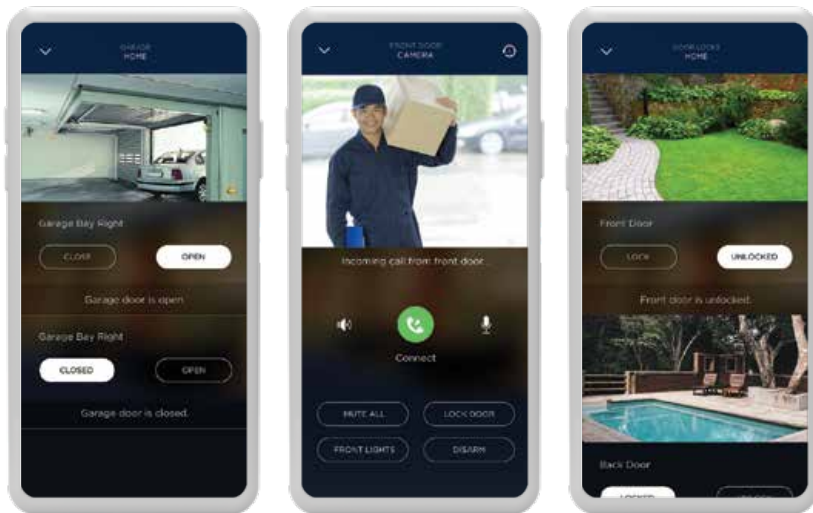

Want to see what happened? Use your device to access video recorded when someone pressed the keypad, or when motion, noise or tampering has been detected. Video clips are automatically stored for 90 days, or lock individual clips to retain for longer.

Customisation

Personalise the entry system controls to lock and unlock doors, turn on flood lights, open the garage door, and more. Ask your Authorised Integrator to create up to four custom buttons on the Entry Services screen for commonly used shortcuts.

SAVANT ENTRY SERVICES

Garage Door & Door Lock

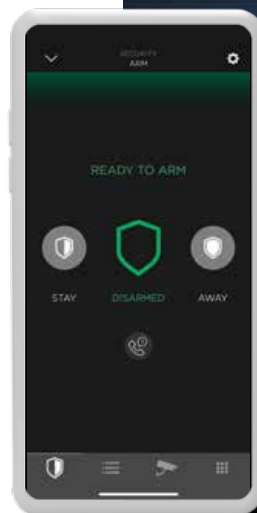

Garage doors indicate if they are open or closed and show warnings if there are any problems.

Lock and unlock doors and see the status of which doors are locked and which are not at a glance.

View cameras to see who is at the door, even if you are away from home.

Security

Set alerts for motion or noise. Plus, night vision allows you to monitor your entryway if movement is detected, even in the dark. Optional tamper sensors to provide an alert if anyone attempts to open or disconnect the door station.

SAVANT TRUEIMAGE LIGHTING

By delivering visual control of lights through Savant's patented TrueImage technology, Savant makes the lighting control experience effortless. TrueImage technology is designed for you to take a photo of your light and save it in the Savant Pro App. With images of each light, lighting control is easy, simply touch the image and see the colour and brightness simultaneously change in your virtual light and in your real-world fixture.

Step 1: Take Your Trueimage Photo

Simply hold your mobile device up to the light to snap your TrueImage photo. Hold steady, the light will blink while the Savant Pro App quickly takes two photos in less than a second, one with the light on, one with the light off.

Step 2: Scale & Crop Your Image

Perfect your image by getting it scaled to size.
Tip: if the image is blurry, try using a tripod for a clearer picture.

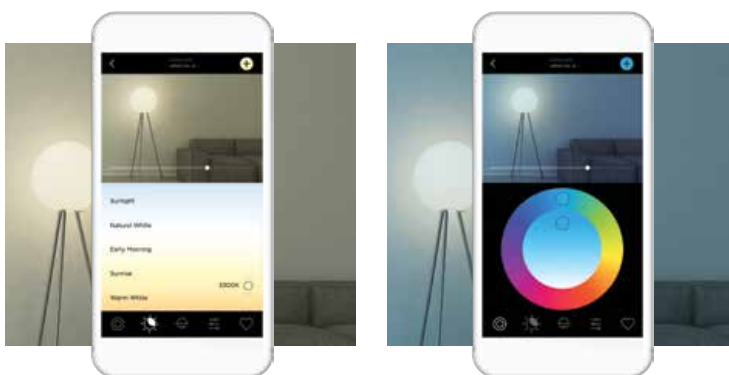

Step 3: Set Defaults

Set dim level and, with Savant Smart Bulbs or DMX Strips, set default WRGB Colour.

Next Level Colour

TrueImage even works with coloured lighting. The millions of colour options available with Savant Smart Bulbs and Strips are shown in the Savant Pro App, so you can change your lighting colours and see what it looks like, even when you are out of the room.

Choose your lighting accents by individual colour or from a list of colour temperatures perfect for working, entertaining, or relaxing.

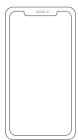

SCALABLE SYSTEM ARCHITECTURE

Savant not only designed control and automation to be easy to use, but also quick to configure and deploy. Although the system is scalable across many project types and size, at its core are three basic components that are required to create a Savant System: a Savant Host, a Savant Controller, and a User Interface.

Savant Host: The Brain of the System

The Savant Host takes commands from any of Savant's User Interfaces and sends direction to the Controllers with the details on which subsystems to control.

Savant User Interfaces: The Beauty of the System

The Savant User Interfaces are designed to deliver a personalised control experience. User Interfaces include mobile devices, touch panels, remote controls, keypads climate interfaces and even voice.

Savant Controllers: The Brawn of the System

The Savant Controllers act as Bridge between the Savant Host and the subsystems that are being controlled.

Savant Studio

Savant Cloud
Mgmt (SCM)

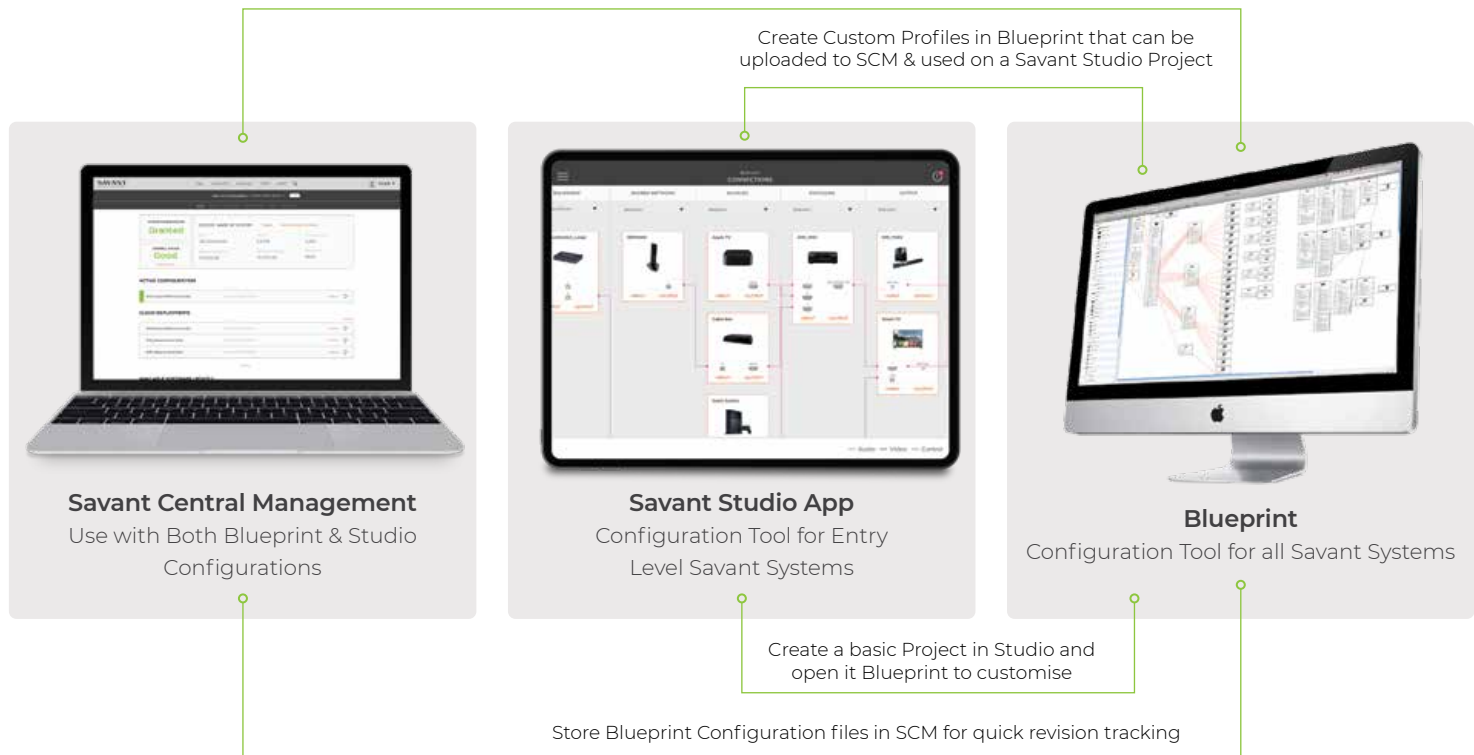

Savant Pro App
(iOS, Android)

Savant Tools: The Power to Personalise Each System

The Savant tool set includes Savant Studio, an iOS-based, field configuration tool for end-to-end system design and deployment. Savant Studio supports the full range of features and services with Savant music, lighting, climate, and more.

Savant Studio, working in conjunction with Savant Central Management allows for efficient, scalable programming through remote configuration and diagnostic tools, auditing practices for field service, secure employee access and system/software tracking across all installations.

Light Engine

The Avation Light Engine is an intermediary communications server, a Co-Processor Module to facilitate control and state feedback between Clipsal C-Bus, Dynalite, Philips Hue, Fibaro HC3, Airstream iZone, and Inner Range Inception.

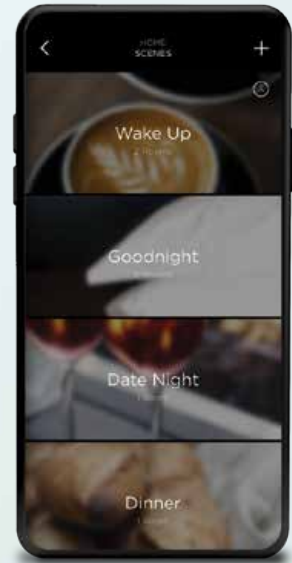

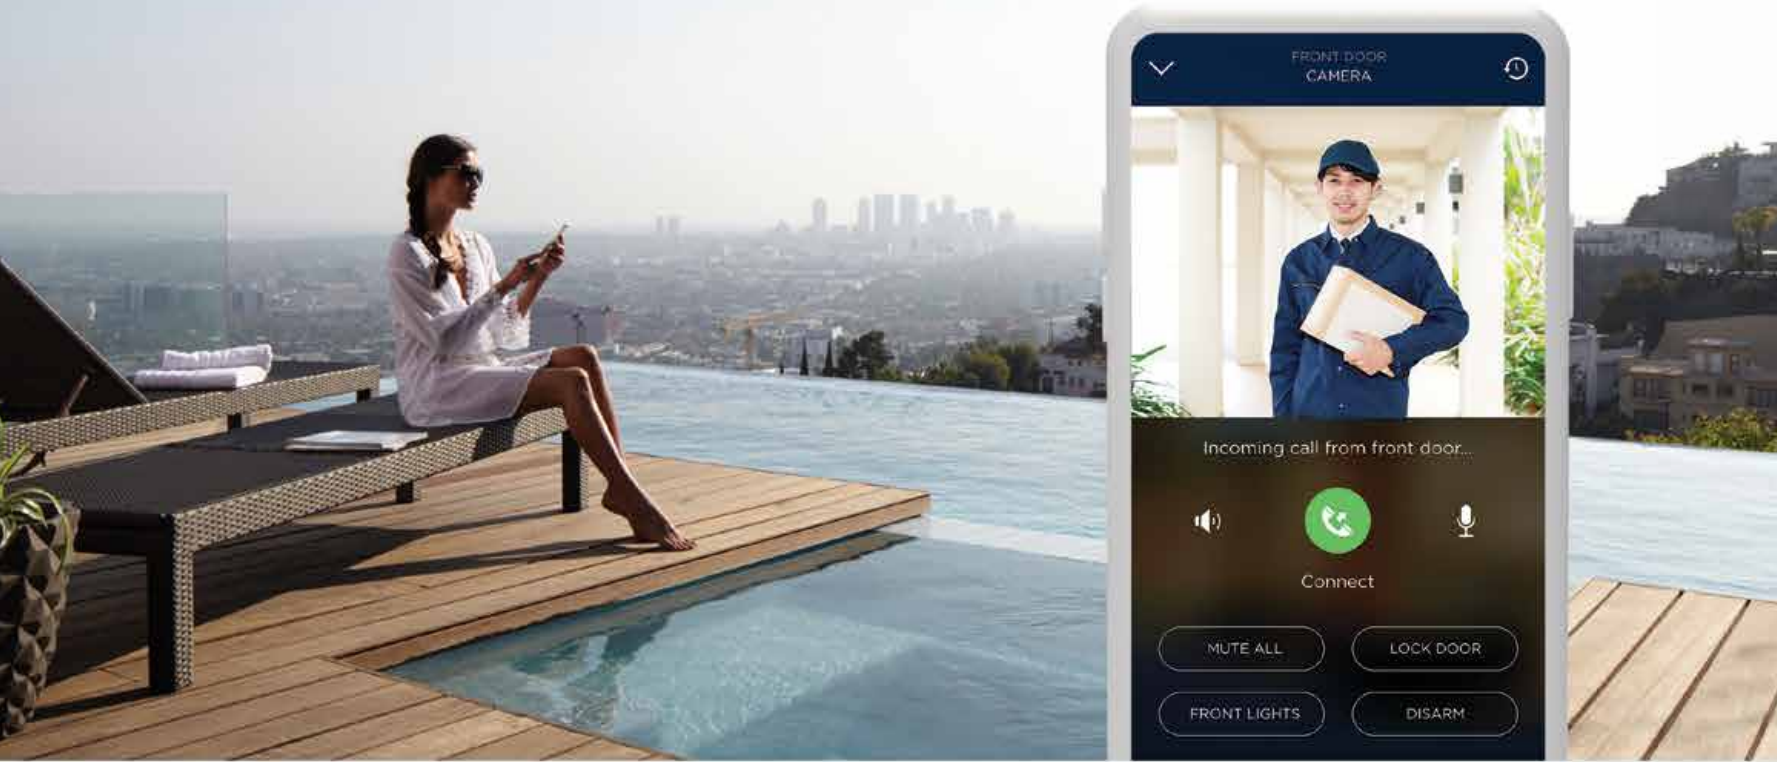

The web interface allows for quick and easy lighting system integration with Savant allowing you to convert the Cbus or Dynalite system file directly to a Savant Plist without having to type in the addresses. It also incorporates the profile for fast set up and integration

The Avation Light Engine POE v2 is housed in a DIN rail mounting enclosure. It features an rs232 port as well as the option to select between static IP and DHCP assignment and the unit supports POE power while a micro USB PSU is included if POE is not available. Please note C-gate installations natively embedded on the Savant Host are no longer supported

ANSWER FROM ANYWHERE

Be notified instantly when someone is at your door with an audio and video feed from the door entry station, regardless of where you are. Answer to start the two way intercom, and unlock the door, turn on the lights or activate a Savant Scene.

SAVANT HOME APP FOR APPLE TV

On-Screen Display Re-Imagined

The new Savant Home App for Apple TV delivers on-screen control of your entire home, including climate, lighting, audio and more.

The Savant Home App delivers you the power to view door station cameras, adjust temperature and music, set your favorite Savant Scene, and create the perfect mood by adjusting lights to just the right colour.

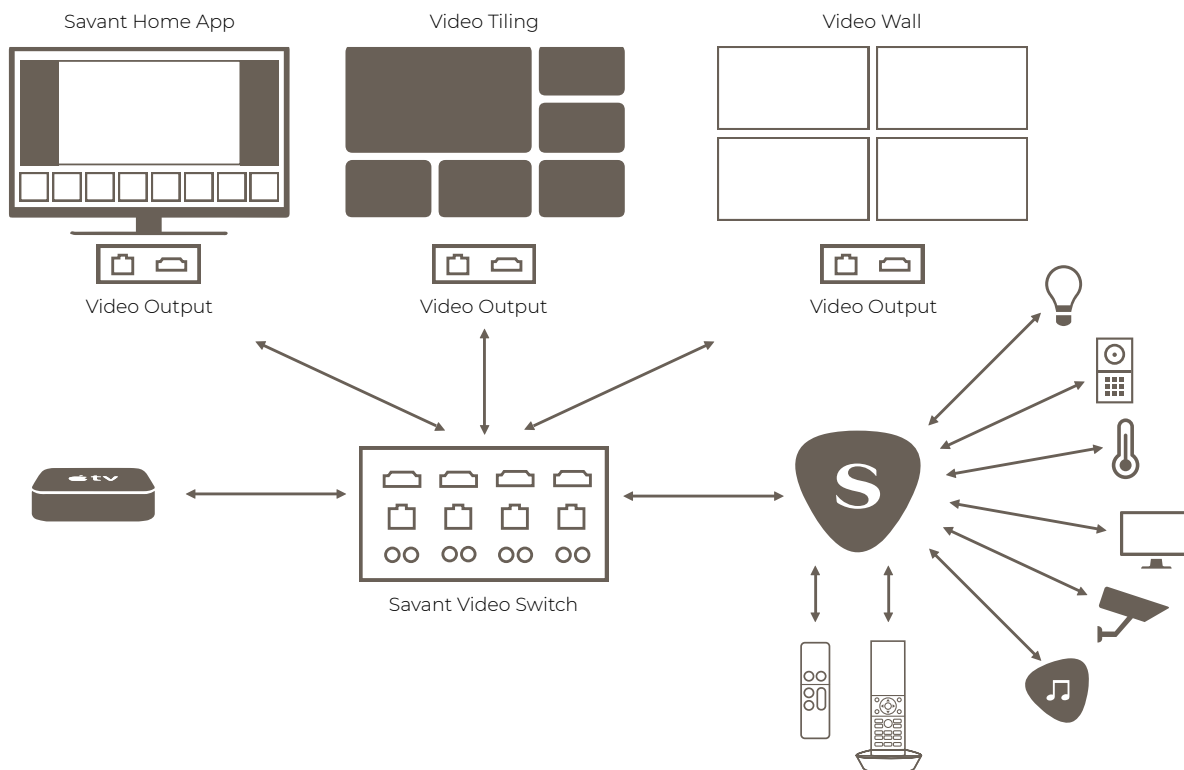

The Savant Home App is scalable to fit the needs of any home. When used in conjunction with Savant IP Video, advanced features are available including the ability to bring up the on-screen menu without missing a beat. Simply launch the On-Screen Display feature from any Savant remote control and the menu bar appears directly below the action.

You can also choose the Savant Home App in Direct Mode. Direct Mode brings up the menu full-screen and requires only an Apple TV for simple set-up.

IP Video Control

Combined with Savant's award winning IP Video switching technology, the on-screen experience does not require you to switch sources from what you are currently watching, even if you are in Video Tiling Mode. Plus the Savant Home App can be accessed from any TV in the house.

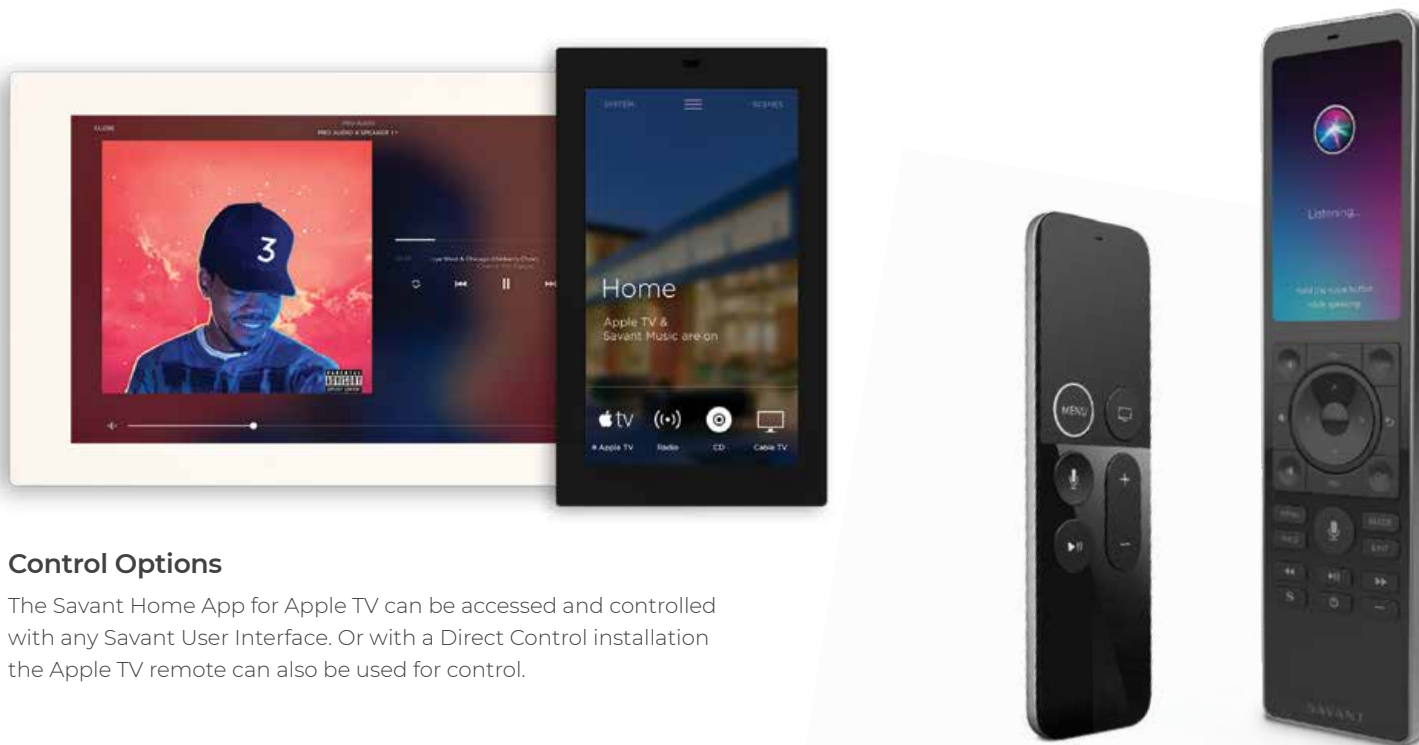

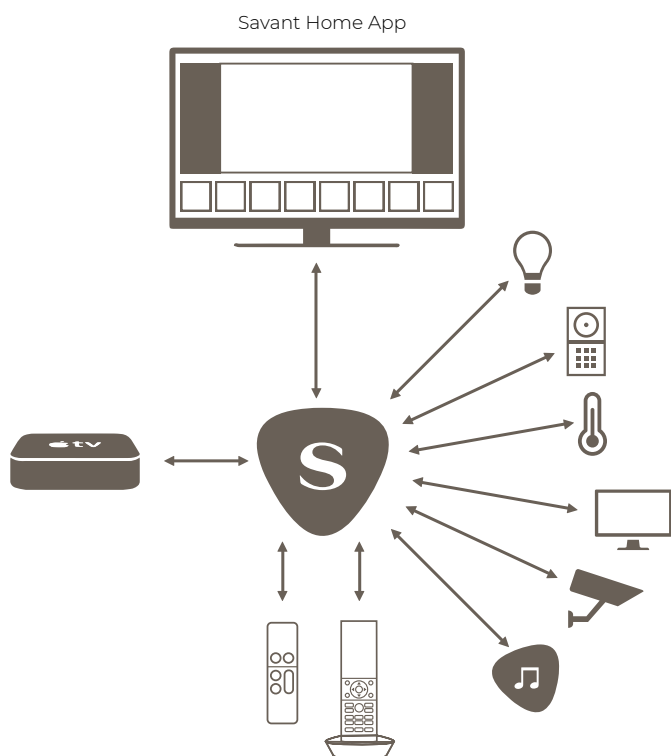

IP Video Installation

Direct Control

With simple installation and design for an individual TV, the Savant Home App for Apple TV displays just like any other video source, presenting a full screen control center for your Savant Home.

Direct Control Installation

Control Options

The Savant Home App for Apple TV can be accessed and controlled with any Savant User Interface. Or with a Direct Control installation the Apple TV remote can also be used for control.

Lighting

Full control of any lighting fixture in your home, including visual feedback updated in real-time with Savant's Truelmage technology.

Security Cameras

Peace of mind at the touch of a button. View your security cameras in full-screen resolution without leaving your couch.

Shades

Shade control is as easy as selecting the shade and adjusting the height.

Cable TV

Bring up the cable TV guide or quickly navigate to favorite channels with the Cable TV service.

Climate

Climate control is as easy as selecting the desired climate zone and adjusting the set points on-screen.

Music

Seamlessly traverse albums and playlists. Display info on what's playing right now for party guests.

Energy

Check in on the consumption or generation of energy within your home.

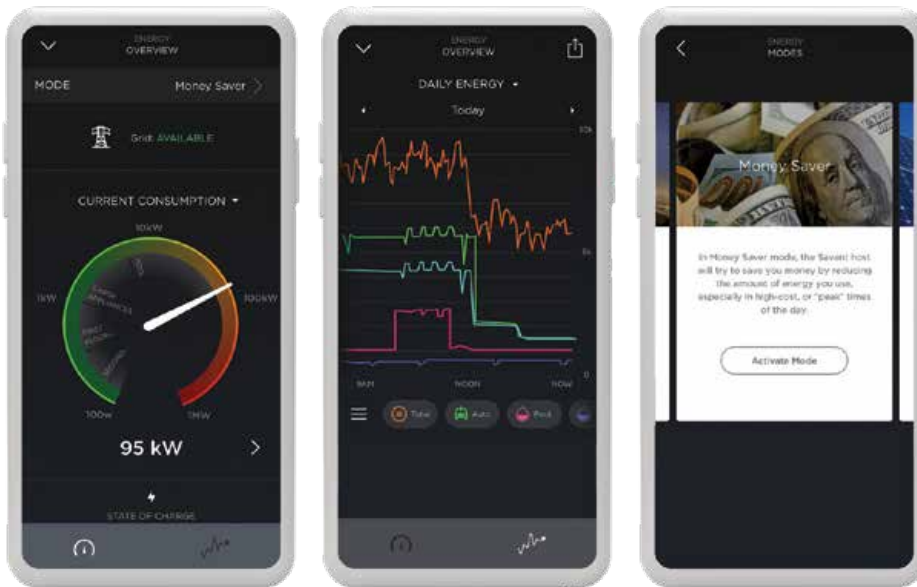

IP Video Control

Combined with Savant's award winning IP Video switching technology, the on-screen experience does not require you to switch sources from what you are currently watching, even if you are in Video Tiling Mode. Plus the Savant Home App can be accessed from any TV in the house.

ENERGY MONITORING & MANAGEMENT

The Savant Pro App provides real-time, utility grade energy information.

View and monitor energy usage trends, see real-time, utility grade consumption data and activate pre-defined Energy Modes. Energy Modes are like Savant Scenes for energy consumption.

Pair the Savant System with Racepoint Energy Solar Panels and battery storage systems and now you can manage energy generation, storage and consumption.

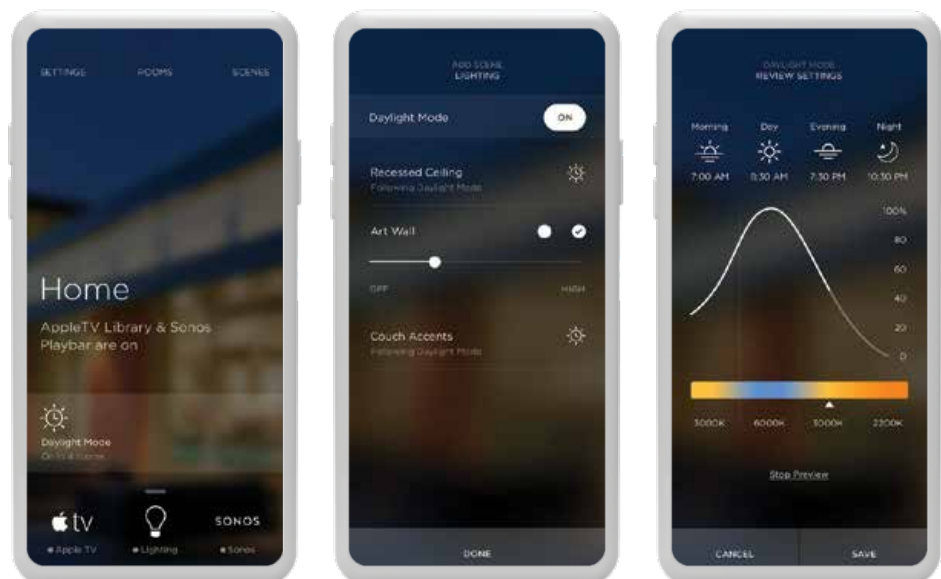

DAYLIGHT MODE

Create and control your own Personal Wellness Experience.

With **Daylight Mode** activated, your lights will transition through colour temperatures throughout the day to correspond to the sun.

Designed to help with your circadian rhythm, lights will adjust to warmer temperatures in the morning and evening and cooler in the middle of the day.

USAI Lighting, Savant DMX Light Strips & Smart Bulbs are all compatible with Daylight Mode.

SAVANT IP VIDEO

Thrill the Audience with Savant IP Solutions

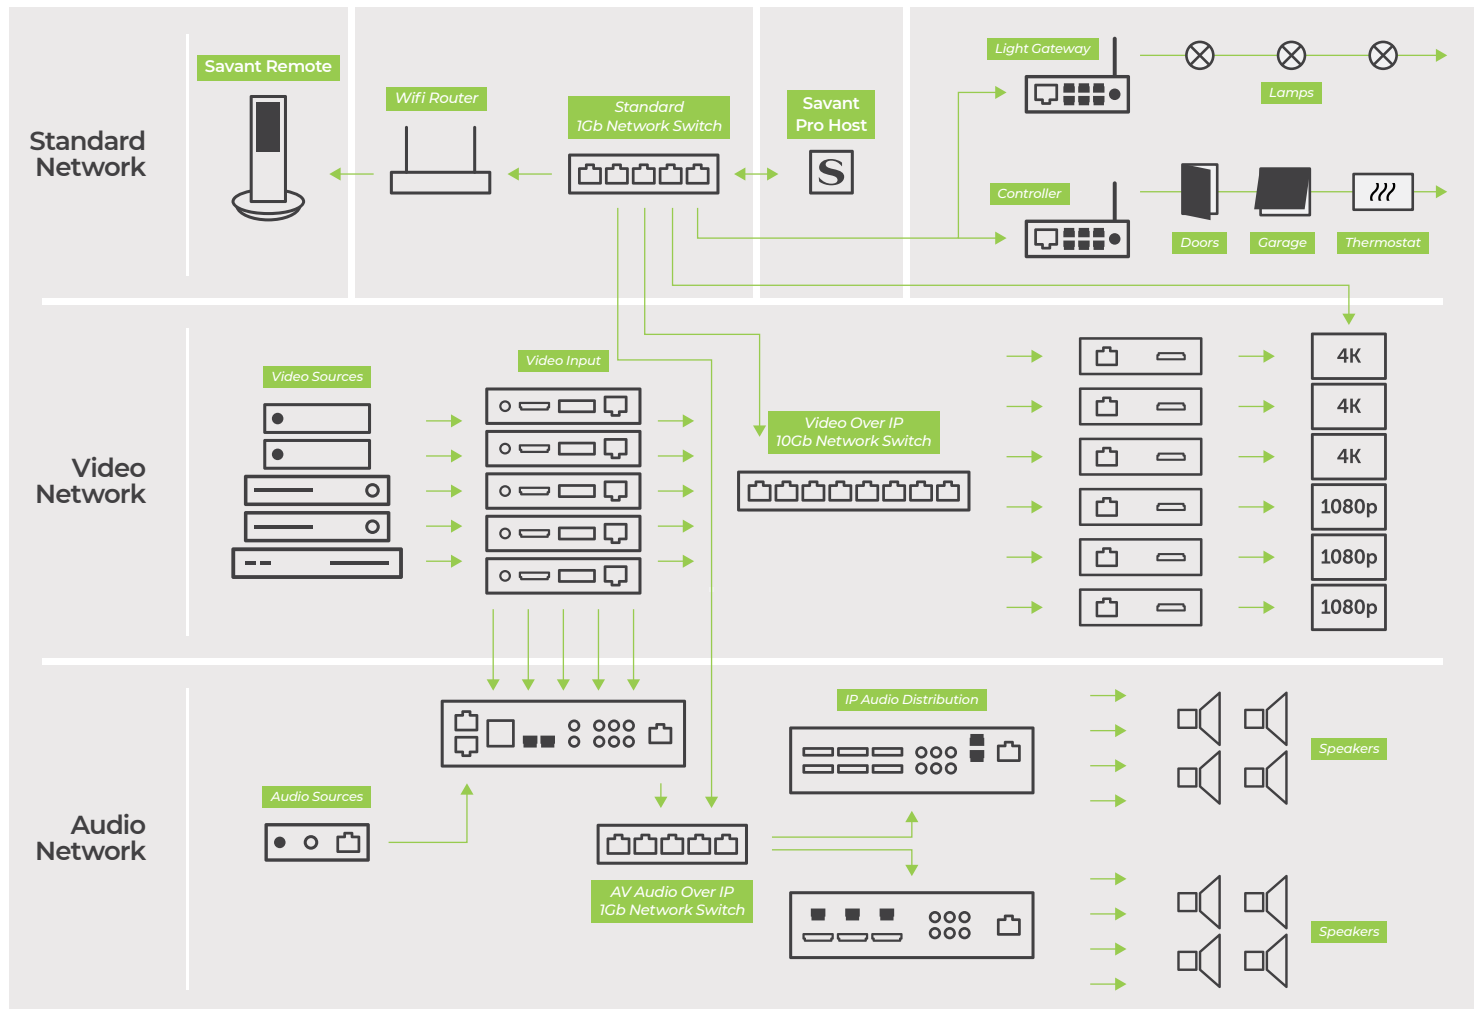

IP Video

Savant 4K-Over-IP is an advanced, high-speed, scalable solution that fits equally in small and large video distribution systems. Audio Down-mixing and advanced video processing enable Savant IP Video and Audio distribution solutions to deliver any video and/or audio source to any room.

IP VIDEO TILING – ONLY FROM SAVANT

Display multiple sources on a screen, simply control sources and choose audio, create presets, add to Savant Scenes and much more.

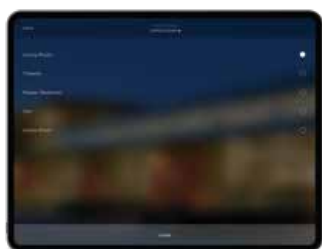

See It All

Savant's unique control interface makes multiple views simple and intuitive. Select from predefined layouts, drag a tile to move views, double tap to expand a particular source, or press and drag the audio icon to choose which source to listen to.

Control At Your Fingertips

Tap on any tile to bring up the control interface for that source. Whether it's streaming, cable, satellite, or your favorite gaming console, Savant's advanced interface determines the right controls for that source.

Video Tiling Anywhere

With Savant's IP Video solutions, Video Tiling is available on any display connected to the IP Video system, either with the same view or each with an independent view.

All Your Favorites

Access all your favorite channels at a touch. Save certain views with predefined layouts, channels and sources. Keep one for all your morning information, one for your work day, and another for game day, the choice is yours.

High-Performance Entertainment

Distribute pristine pixel perfect video at the highest resolutions, and clean, clear audio from source to speaker. Deliver scalable and reliable custom systems that live up to the Savant name.

4K

Only From Savant

Savant IP Video combines the latest in 10GbE networking with proprietary technology to distribute exact uncompressed video with zero frame latency at the most commonly used 4K resolutions*. Includes support for HDCP 2.2 and HDMI 2.0a with HDR**.

Super Scale

Use Savant IP Audio and Video for your largest distribution jobs. System size is only bounded by the network. Simply add more Savant IP transmitters or receivers on the network to add a new source or display to the system.

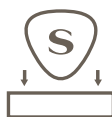

Bring The Audio

Only Savant provides solutions for simultaneous audio distribution over IP. Options available to down-mix surround audio to 2 channel and distribute over the AVB/TSN network, or use PCM audio.

Rock Solid Reliability

Savant pioneered reliable, fast switching HDMI distribution with audio and uses the same technology to deliver synchronised video and audio content to any room over IP.

At Your Command

Includes Savant control ports for each input and output. With support for Video Tiling, format locking per display, video down-conversion and EDID management, Savant IP video ensures you are always in command.

Future Proof

10GbE network bandwidth ensures that your video distribution system will be ready for whatever tomorrow brings.

SAVANT IP AUDIO

Savant IP Audio Distribution

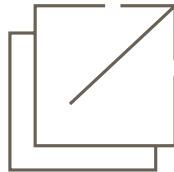

Any source, any speaker. The Savant IP Audio product line is a decentralised, massively scalable audio distribution solution. Utilising AVB, a plug-and-play networking protocol, Savant IP Audio systems distribute and synchronise high resolution audio anywhere in the home. Simply plug any Savant IP Audio module into an AVB Ethernet switch to add audio to any room.

Source-to-Speaker

Only Savant offers a complete source-to-speaker audio distribution solution. Enjoy high-performance end-to-end delivery of digital music that circumvents the signal loss and degradation of traditional analog music systems. Deploy dynamic solutions that blend in-room speakers with the enhancement of a subwoofer to provide a richer experience.

Modular & Scalable

Design systems using products with the perfect combination of music, switching, amplification and control. Fewer products, less rack space, quicker deployment, higher satisfaction.

Savant IP Audio offers the flexibility to deploy any sized solution from an enhanced single room audio experience to the largest of distributed applications.

Distributed Architecture

The home network has changed everything about our modern lives, including how we distribute audio signals throughout a home. Savant IP Audio leverages leading network technologies to decentralise your system and place equipment where it makes sense – closer to speakers or even in another building. A single category cable is all that is required to link it all together, reducing wiring and installation costs.

High Resolution

Your favorite streaming sources are delivered in stunning, high-resolution audio to any area of the home. Sit back and enjoy the experience of sitting in the recording studio with your favorite artist.

Seamless Integration

The perfect companion to a Savant IP Video system, Savant IP Audio works hand-in-hand to ensure synchronised delivery of stereo sound for any video source being distributed to your TV.

Standards-Based

Utilising Audio Video Bridge (AVB), a plug-and-play IEEE networking protocol, Savant IP Audio systems distribute and synchronise high resolution audio throughout the home with extremely low latency.

IP AUDIO MICRO APERTURE

Key Features

Aesthetics Above

These decor friendly in-ceiling speakers are available with compact, paintable round or square perforated grilles which compliment USAI lighting fixtures for a clean crisp look that architects, decorators, and clients will love.

Install EZET™ Tool-Less Installation

Exclusive magnet and spring clip design ensure the speakers stay secure in the ceiling, yet can be removed easily without needing to unscrew anything. The trim mounting ring makes them a perfect fit for both new construction and retrofit projects.

Low Balanced, Large Audio

Balanced Mode Radiator audio technology allows for big sound with far lower power requirements than traditional speakers.

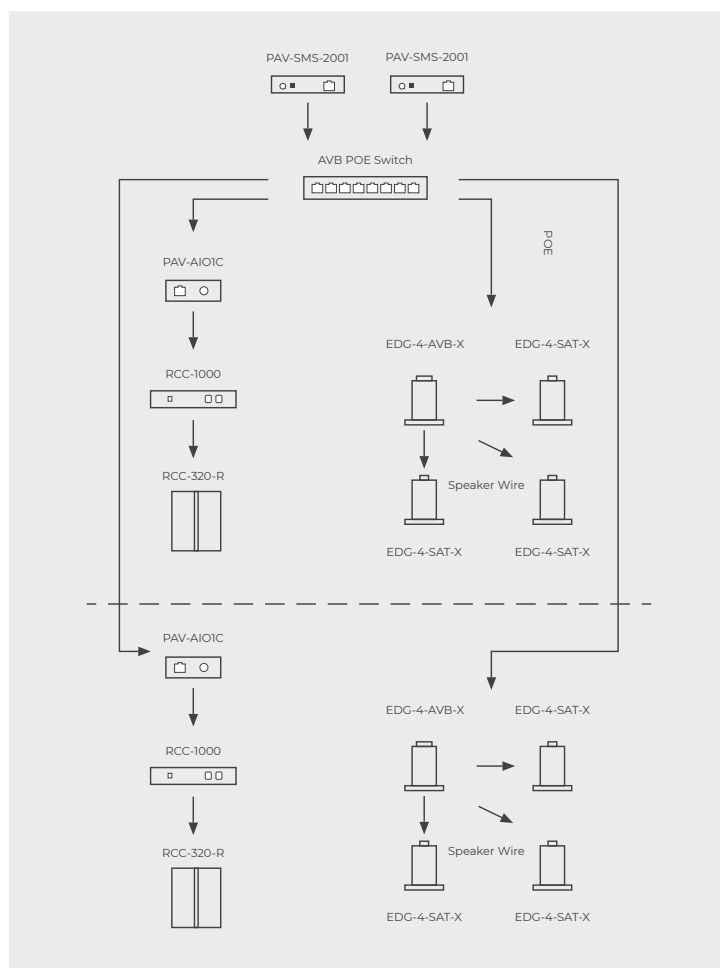

More Speakers, Better Sound

Large in-ceiling speakers create audio hot and cold spots in a room, too loud when you are right under a speaker and too soft everywhere else. Micro Aperture speakers are just right.

Design Friendly, Budget Friendly

IP Audio Micro Aperture active speakers include a internal amplifier and integrated electronics with Power over Ethernet and passive satellite speakers. Standard Micro Aperture passive speakers are also available for use with conventional amplification.

IP AUDIO MICRO APERTURE 4,
ROUND EDG-4-AVB-R

IP Audio Connected

IP speakers are a new innovation in the way sound is delivered. Isolated from rooms above through their closed backs, IP Audio speakers are POE powered and can drive up to three IP satellite speakers. This provides a 4-speaker capacity based on a single IP speaker and POE connection. Each IP speaker is individually controlled and connected to the network digital direct, eliminating the problems inherent with long analog audio speaker cable runs.

Rooted in the company's rich history in telecom, Savant IP Audio utilises AVB to deliver highresolution audio directly to Savant IP speakers. Preserving all the warmth and detail of your music, while simultaneously reducing the cost and complexity of distributed entertainment solutions.

CUSTOM SPEAKER GRILLES

By adjusting the size of the grille rather than the Soundbar or Side Mount speakers to adapt to any TV, our engineers can precisely tune each enclosure for optimal performance. When it's time to replace your screen, simply order a new grille for a perfect fit.

Design Custom Speaker Grilles Using The New Online Grille Designer

Step One:

Log in to Savant Store and the create a new project in the Grille Designer. Enter project and room to get started.

Step Two:

Enter speaker and display information, including speaker mount location so proper cutouts can be accounted for. If display information is not listed or you have a unique mounting location, custom measurements can be entered.

Step Three:

Grille designs can be saved and ordered once the project is ready.

- Standby power consumption < 0.5W
- Frequency Range 50Hz-20KHz
- Bluetooth version V5.0
- Bluetooth Distance 10m
- Incredible sound quality

PRESENTATION SCALER SWITCHERS

Multi-format signal converting and scaling, Seamless switching,
Ultra 4K, HDBaseT and Multiple control options

AVGear provides a comprehensive range of presentation solutions to seamlessly manage multi format audio and video switching for meeting rooms, boardrooms, classrooms & video conference rooms, etc.

AVGear scalars typically provide integrated control, switching, an audio amplifier and Mic mixer and are housed in a compact size chassis. Our latest models of AVGear presentation scaler

switchers can handle ultra 4K resolution, seamless switching and long transmission distances up to 100m with PoE from a built in HDBaseT output port. AVGear presentation scaler switchers are capable of upscaling and downscaling multiple signals to provide excellent picture quality. Models in the range vary from 5 inputs up to 12 inputs to meet a variety of applications from small meeting rooms to large auditoriums.

AVG-SC42

The AVG-SC42 is an HDMI2.0 4x2 all in one presentation switcher with 4 inputs (3 HDMI & 1 USB- C) and 2 HDMI matrix outputs.

Key Features

- Inputs (3 HDMI & 1 USB-C) and 2 matrix HDMI outputs
- HDMI2.0 & HDCP2.2 or backward compatible
- HDMI Video Max to 4Kx2K@60Hz 4:4:4, 18G bandwidth, HDR supported
- AUTO-SW or GUI control
- MIC and LINE inputs can be mixed to the audio outputs
- Supports 3 microphone types, Condenser, Dynamic and Wireless
- Smart EDID management: Preset EDIDs and customised setting allowed
- Fast switching for instant display
- Supports firmware upgrade

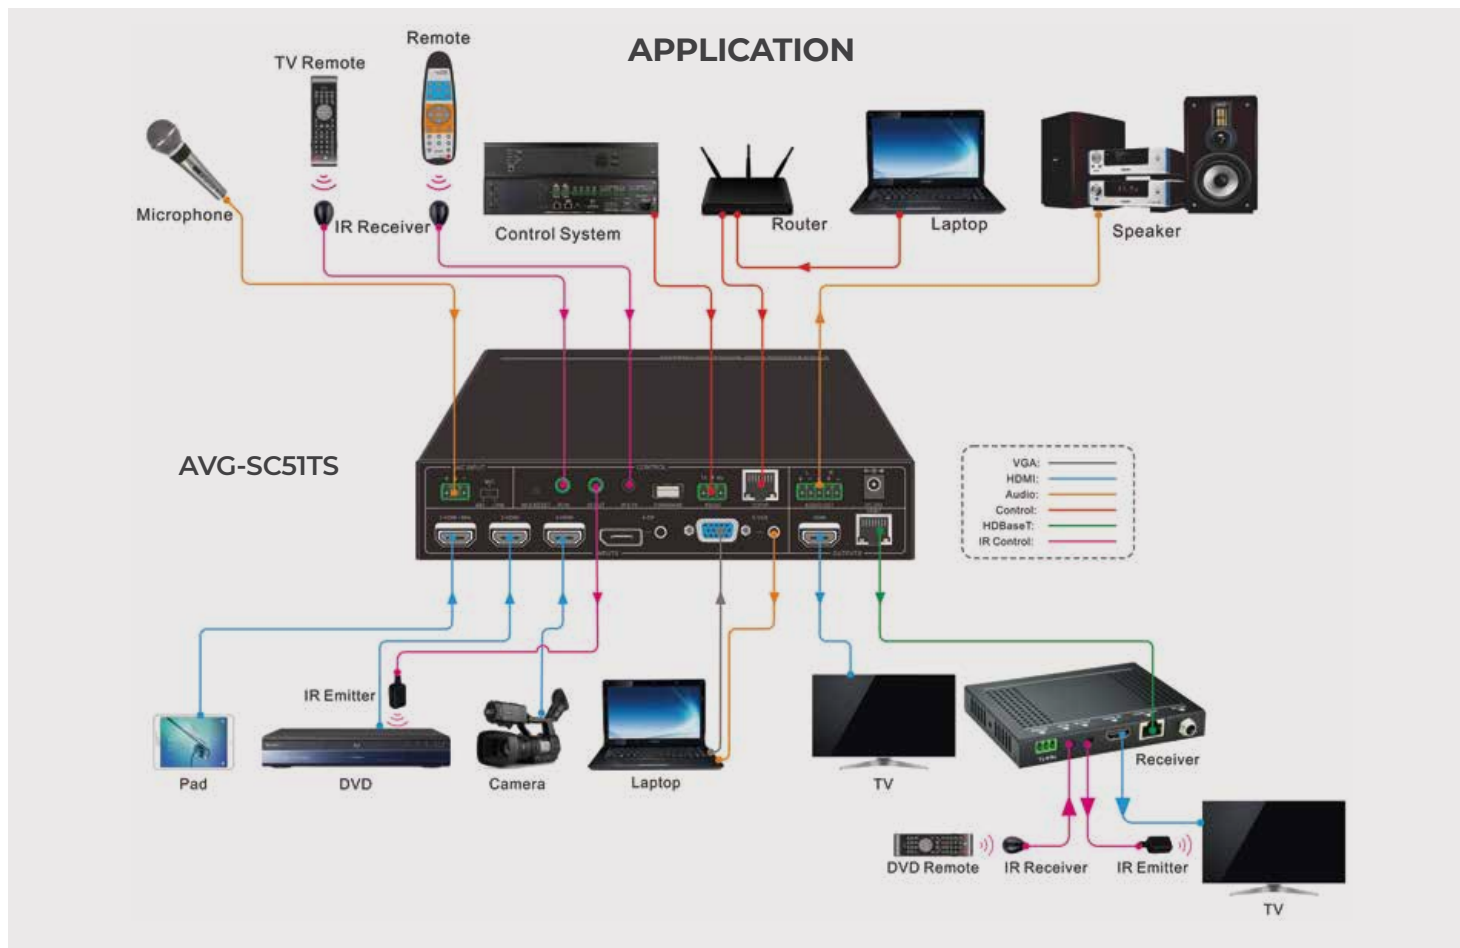

AVG-UHC41A

The AVG-UHC41A is a 4x1 presentation switcher with 4 inputs (3 HDMI inputs & 1 USB-C input) and 1 HDMI output.

Key Features

- Supports HDMI 2.0 and video resolutions up to 4K@60Hz 4:4:4 8bit, 1080P, and 3D
- 18G bandwidth and supports HDR10, HDR10+, Dolby Vision
- HDCP2.2 compliant
- Features auto switching
- CEC control for display volume and power control
- Controllable via RS232 and IR,GUI
- Optical and balanced analog audio, audio de-embedding
- Smart EDID management for various applications and customised settings

AVG-SC51TS

The AVG-SC51TS is an HDBaseT seamless scaler switcher with 5 video inputs, comprising of 3 HDMI, 1 Display Port, 1 VGA with audio & 1 MIC input. It scales & switches any video signal to HDMI and HDBaseT outputs with De-embedded audio. The scaler switcher provides scaling up to resolution 1920x1200 inputs and outputs.

Key Features

- Seamless switching Integrated with the latest HDBaseT technology
- Unique scaling for seamless switching with Output resolutions selectable
- HDMI & HDBaseT output simultaneously with audio de-embedded
- Auto switching between inputs
- PoH certified, from scaler to HD300SR receiver
- 3-level MIC inputs with mixing
- CEC control
- Controllable via GUI, front panel buttons, IR & RS232, TCP/IP

AVG-UHS41 DA

The AVG-UHS41 DA is an ultrathin auto switcher with 4 HDMI inputs and 1 HDMI output. This switcher supports HDMI video resolutions up to 4Kx2K@60Hz 4:4:4 HDR and multi-channel audio. The switcher also supports audio return channel (ARC) for transmitting audio back to the HDMI input and audio output ports from the connected display.

Key Features

- Switches any of the 4 HDMI inputs to 1 HDMI output
- Supports video resolutions up to 4Kx2K@60Hz 4:4:4 HDR
- 18Gbps high bandwidth
- Fully compliant with the HDMI 2.0 and HDCP2.2 specifications
- Supports audio return channel (ARC)
- Supports ARC
- Advanced EDID management: multiple presets and user definable allowed
- Controllable via RS232 and IR
- Supports CEC

AVG-RM4

4 Slots | Easy Mount

The Wallplates features a unique high quality 2-gang decora style HDBaseT wall-Mountable design, solid aluminum housing to ensure ultra-efficient cooling. It supports Auto-switching or button panel control between the inputs and can be used in conjunction with the HD300SR or HD300SR-A and HDWP70-RX as a pair.

The transmitter for HDMI or VGA and Audio inputs, supports HDMI 1.4, IR, and RS232 pass through for transmission up to 70M with PoH function.

The HD550 KIT is a HDBaseT 2.0 extender set, including a 2-gang decora style wall plate AVG-HD550T transmitter and a AVG-HD550R receiver. It transmits HDMI, USB signals up to 100m over Cat 6/6e cable.

AVG-HDWP3-USBC

18G 3x1 Wallplate Transmitter Switcher with 2 HDMI and USB-C.

- HDMI2.0 standard, HDMI signal up to 4K@60Hz 4:4:4, USB-C up to 4K@30Hz 4:4:4
- HDCP2.2 and backwards compatible
- Auto input switching, auto detects the inputs
- Transmission up to 40m at 4K@60Hz or 70m at 1080P@60Hz for HDMI & USB-C signals
- Firmware upgrade by Micro-USB port
- RS232 & IR pass-through with HDBaseT connection and local control
- The DISPLAY ON/OFF button can be programmed by IR learning feature or RS232 command
- Support 12~48V PoC
- Provides external 12V DC power supply for other device like WP series Control Panel

AVG-HDWP-IT

The HDWP-IT is a 1-gang Decora style HDBaseT wall-mountable transmitter for HDMI and RS232. It can be used in conjunction with the AVG-HD300SR receiver as a pair.

- HDMI signal up to 4K@60Hz 4:2:0 8bit
- HDMI1.4 standard and HDCP 2.2 compliant.
- HDBaseT technology, extend HDMI signal 4K up to 40m and 1080P up to 70m
- 10.2Gbps bandwidth
- RS232 & IR pass-through
- Supports 48V PoH

AVG-HD550 KIT

The AVG-HD550 consists of a Wall Plate Transmitter and a receiver which can transmit HDMI, RS232 and USB signals up to 100m using a single CATx cable. The Wallplate features two HDMI inputs and a USB-B port for HID devices such as a Mouse or keyboard.

- HDMI signal up to 4K@60Hz 4:2:0
- HDMI1.4 and HDCP2.2 compliant
- Auto input switching
- HDBaseT technology extends HDMI, USB and RS232 signals up to 100m over CATx cable
- CEC control via the Display Button
- Bi-directional RS232 pass-through with HDBaseT connection and local control
- Ensures display of content protected media and interoperability with other HDCP compliant devices
- 24V PoC, transmitter is powered by the receiver

AVG-HDWP70-TXB

The HDWP70-TXB is a 2-gang Decora style HDBaseT wall-mountable transmitter for HDMI or VGA and audio and RS232. It supports Auto-switching or button panel control between the inputs and can be used in conjunction with the receiver AVG-HD300SR as a pair.

- Integrated HDBaseT technology
- Supports 4Kx2K & is 1080p 3D
- HDMI1.4 & HDCP1.4 compliant
- 70m transmission with PoC function
- HDMI or VGA with audio input selectable
- Built in scaling function on VGA
- Auto switching or manual button control between input sources
- LED's for status indication & USB port for firmware updates
- Machined Aluminum enclosure ensures efficient cooling

HDMI SWITCHER

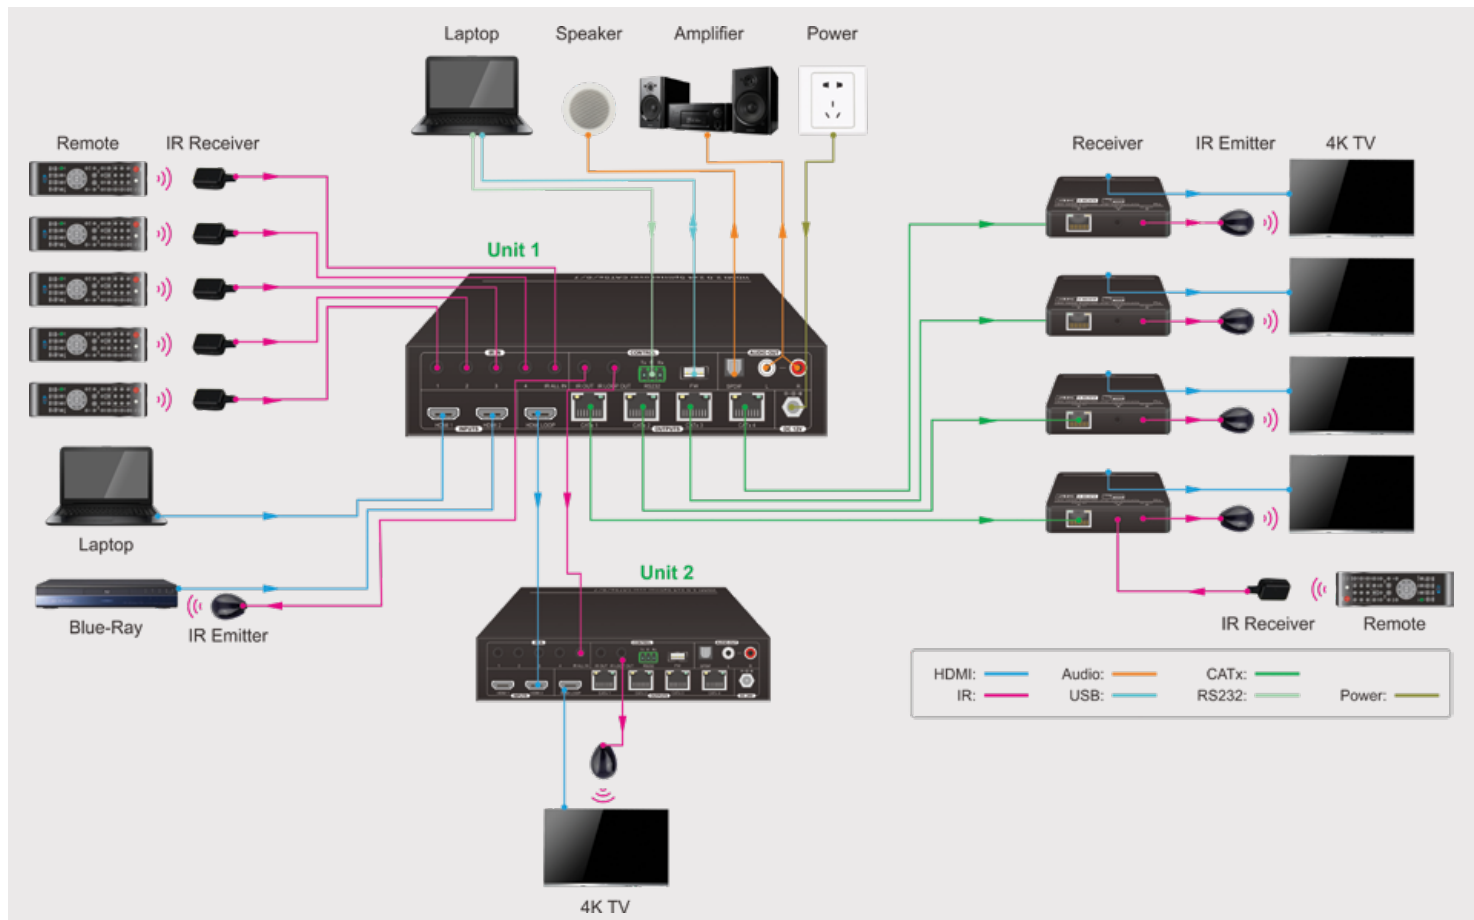

AVG-UDA24-HD70

The AVG-UDA24-HD70 supports switching between two video signals and long distribution range up to 4K 70m via CATx, with HDMI loop out for cascading. It supports video resolutions up to 4K@60Hz 4:4:4 8bit and all HDMI audio formats, and down-scaling from 4K to 1080P. Also supports Audio de-embedding and PoC to power the receiver.

Key Features

- Supports HDMI 2.0 and video resolutions up to 4K@60Hz 4:4:4
- Transmission distance up to 70m for 4K and 80m for 1080p
- Distributes one of two UHD/4K HDMI inputs to four CATx outputs and one HDMI loop output
- Comprehensive EDID management
- Video auto-switching based on 5V or TMDS detection
- SPDIF and L/R audio outputs for audio de-embedding
- Bi-directional IR pass-through and IR cascade control
- Controllable via front panel button, IR and RS232
- 12V PoC to power the receiver

AVG-K12 CLASSROOM KIT

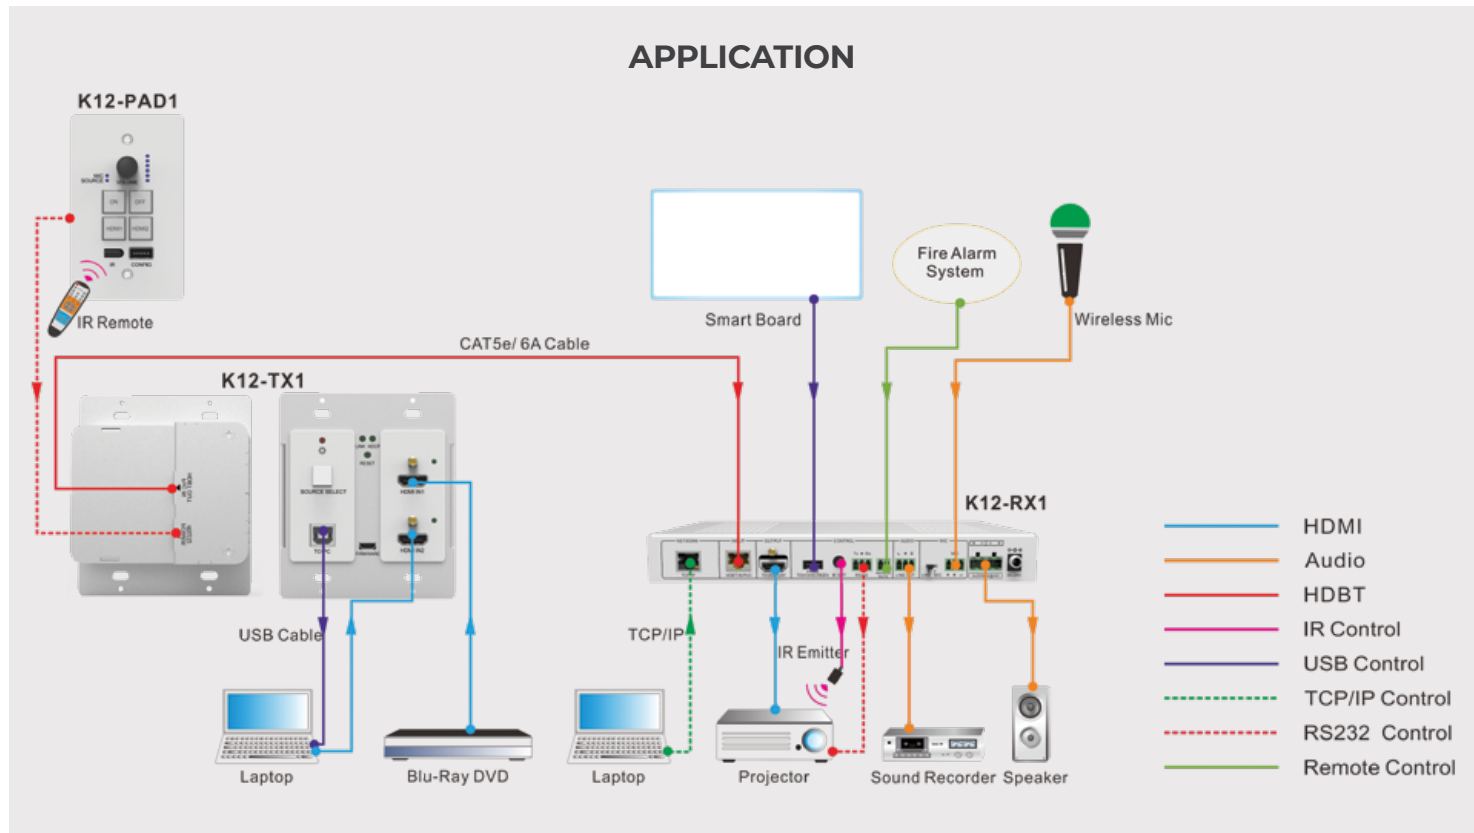

AVG-K12 Classroom Pack

AVG-IP410

AVG-IP410 is a new generation of Power Distribution Units and Remote Power Control systems.

With an embedded web server and HTTPS protection, the AVG-IP410 supports a higher grade of security. Users can control power circuits easily and safely through a web browser on Windows, Android or iOS systems, like Internet Explorer, Google Chrome, Safari web browser.

Key Features

- 4 port Remote power controller for power On, Off and Reboot
- Web Server built-in, control by web browser in Windows, Android or iOS system like Internet Explorer, Google Chrome and so on
- 4 Button Control: Direct manual hardware control each outlet without using the Web browser
- Supports HTTPS, SSL, TCP/IP, DHCP, DDNS, SMTP, Telnet, SNMP, Modbus/TCP and BACnet/IP
- SYSLOG: Support Log function & send to assign IP address
- Time Schedule – can pre-set a suitable time to turn power on / off automatically
- High grade components for reliability and performance
- Back Up for quick setup for multiple devices like Time Schedule, Network Settings, etc
- Supports public e-mail — @gmail.com, @yahoo.com, @hotmail.com, etc.
- E-mail Control & Advice:
 - » Receive e-mails with IPs device boot up.
 - » POP3 Control–Control each outlet ON/OFF via E-mail. No need to do Port Forwarding
- Specific software developed by Aviosys and provided free of charge:
 - » SDK Available: HTTP Command
 - » CNT software (Cross Network Technology) allows users to eliminate port forwarding on the router, simply Plug & Play.
 - » Supports MQTT protocol

As used in:

BUILD ANY SIZE OF HDMI MATRIX OVER IP

HDMI over IP products lets you create any size of 4K or 1080p HDMI matrix using a 1 Gb network and Cat 5e/6 cabling, and can be implemented in residential and commercial installations. Any combination of inputs and outputs is possible, and the system can be easily expanded to accommodate additional sources and screens.

Built-In & Down Scaling

No handshaking issues, watch any content on any display and switch instantly between them.

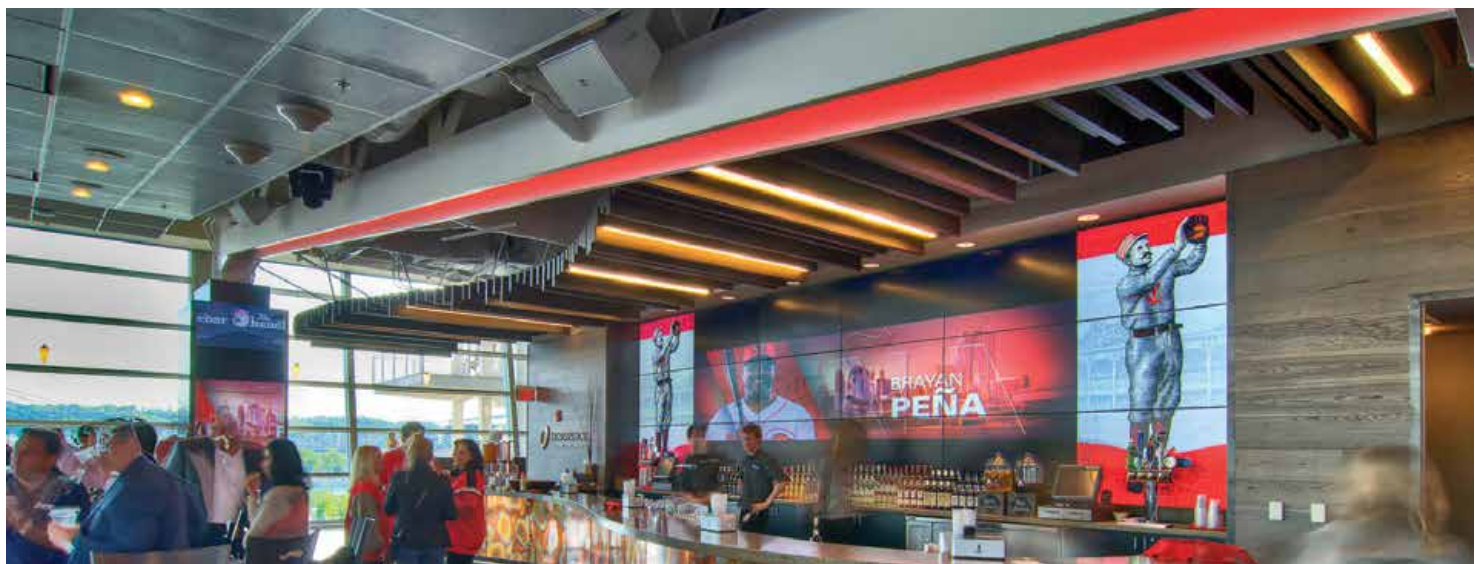

No need to upgrade every TV to 4K, just because a homeowner owns one 4K/HDCP 2.2 source. Our 3G platform features a built-in scaler that downscales 4K with HDCP 2.2 to 1080p, for viewing on Full HD TVs. You can instantly switch between sources too, which a traditional matrix can not.

High Definition Audio for Cinema Sound

Supports Dolby Atmos, DTS-X & Downmixing From 5.1

Perfect for luxury home cinema jobs with object-based audio requirements. Deliver Dolby Atmos and DTS-X using the 3G+HIFI transmitter as part of your 3G Ultra HD over IP matrix. For sources that need to be enjoyed in 5.1 multichannel zones and in 2.0 channel elsewhere, use a 3G+AVPro transmitter with licensed Dolby DSP.

The Handlebar at the Great American Ballpark

Stadium Sports Bar // Cincinnati, Ohio, USA // 15 sources x 68 displays // 3x6 video wall // 4x5 video wall

NorCom's install at The Handlebar sports bar and grill in the Great American Ballpark shows just how creative integrators can be with video distribution when they use Just Add Power. A huge 3x6 8199 x 2304-pixel video wall covers the area behind the bar and allows for almost any selection and combination of source or content, including cable, broadcast, scoreboard feeds, instant replay, bullpen camera, pitch speed and Kiss Cam.

One of the most visually striking elements is two huge HD video columns that use LG 55-inch 5760 x 5400-pixel resolution displays to broadcast a range of live camera feeds, HD baseball programming and digital signage. A 4x5 social media wall with 50-inch Sharp LCD displays lets fans see and post promotions, tweets, Instagram photos and sponsor announcements.

- Display 4 Sources on 1 Display
- View on Any Screen
- Adjustable Transparency
- Custom Sizing & Placement
- Mix Any Resolution Source
- Local HDMI Out
- Stackable for Unlimited Tiles
- Smooth Transitions for Live Events

The Video Tiler allows any integrated screen with a Just Add Power Receiver attached to do multiview. Tile four (or more) HDMI sources on a single display in a variety of viewing modes.

FEATURED DEVICES

ST-1 Sound Transceiver

JAP-HDIP-ST1

Operates as either a Transmitter or a Receiver.

Use the ST1 Sound Transceiver to add a stereo audio source to a Just Add Power system, or to extract stereo audio from an existing Transmitter. Supports up to 192kHz 24-bit 2-Channel LPCM Audio.

Dante Enabled TX

JAP-HDIP-767DSS

Send and receive up to 8-Channels.

The Dante Enabled Transmitter allows any Just Add Power system to exchange 2-way audio with any Dante or AES67 sound system. Including all of the 4K system wide features found within the 3G Ultra Transmitters, this device has the richest feature set in the industry.

3G POE TX With Stereo Extraction

JAP-HDIP-708POE

Supports all lossless audio formats - including Dolby Atmos.

The 708POE Transmitter with Stereo Audio Extraction can distribute 4K video, stereo audio, and breakout analog audio on a single device. Input stereo audio to enable the stereo audio extraction port to feed into a stereo distribution matrix.

MAXCOLOR™ SERIES

4K 60Hz
4:4:4
36 Bit Colour

MC-TX1 Transmitter

MC-RX1 Receiver

MaxColor™ Series

This new series natively supports 4K@60Hz in and out, allowing end users to play High Dynamic Range video, including Dolby Vision and HDR10+ formats, using the growing number of Ultra 4K sources and devices. With MaxColor™, 4K60/4:4:4/36-bit colour video can be distributed over a 1Gb managed network using existing CatX (Cat5e minimum) cable, eliminating the expense of upgrading to fiber and buying more costly network switches.

Use MaxColor™ 4K60 Transmitters and Receivers to create your new system, or bridge them to 3G Ultra models to support a variety of source and screen formats.

MaxColor™ can run parallel and or be bridged with 3G Ultra models. Bridging requires additional hardware.

CHOOSING A SYSTEM

Just Add Power built its reputation for outstanding performance on its design using VLAN switching on a closed network to distribute audio and video with zero detectable latency. For most installs, a **VLAN system** is still the **best performing option for a Just Add Power AV system**.

For some larger installs where equipment is already in place or must be consistent across the company's network, a multicast system is necessary to meet these requirements.

Use the guide below to help you choose the type of system that's right for your next project.

4 Bedroom Residential Install: Second Floor

3 Sources × 5 Displays

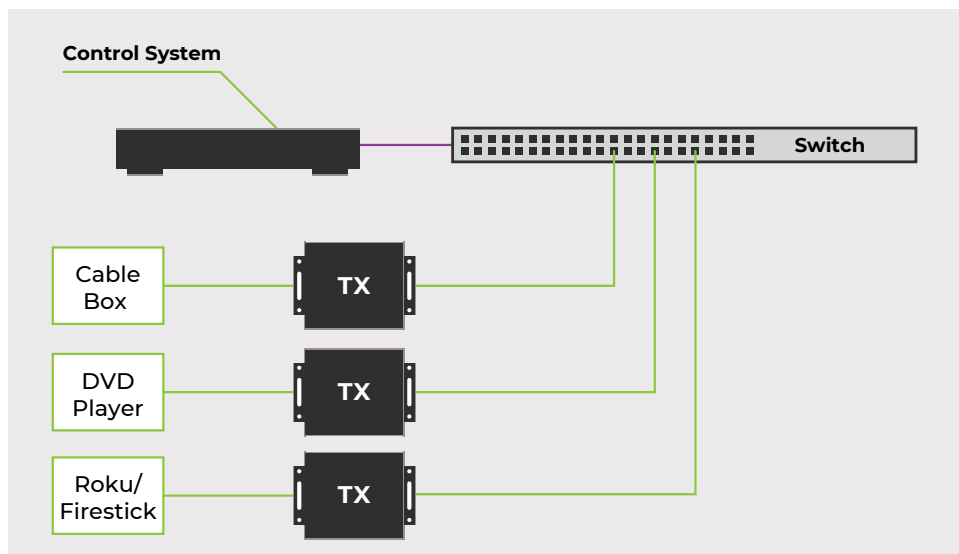

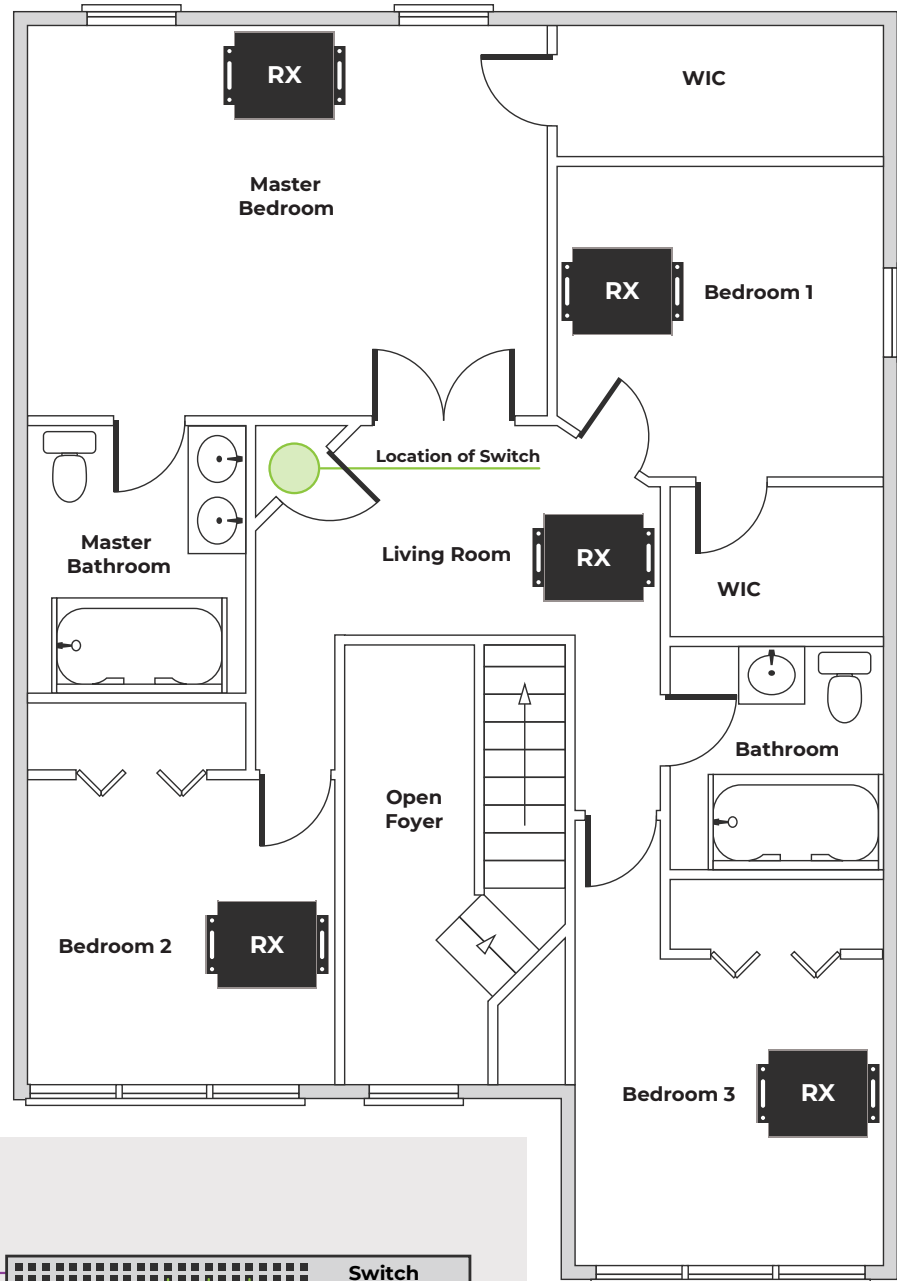

A simple two story install with a switch located upstairs in the living room closet with 3 sources and 1 display per room (5 total displays).

Residential AV over IP

With Just Add Power, residential installers benefit from having no fixed number of inputs/sources or outputs/ displays to work around, have no difficulty distributing to distances over 100m in large luxury homes, and like the fact that they can easily return to a site in the future to expand the system when desired.

20 Sources × 30 Displays

This install is a perfect example where an installer has used stacked switches to distribute AV throughout this large commercial space.

Paired with a compatible control system, the client and their employees easily manage the sources and screens from anywhere in the building.

Pro AV & Commercial AV over IP

Whether it's an airport, office building, a sports bar or a stadium, Just Add Power lets you build a video distribution system of networked AV devices that is scalable, reliable, economical, and easily controllable.

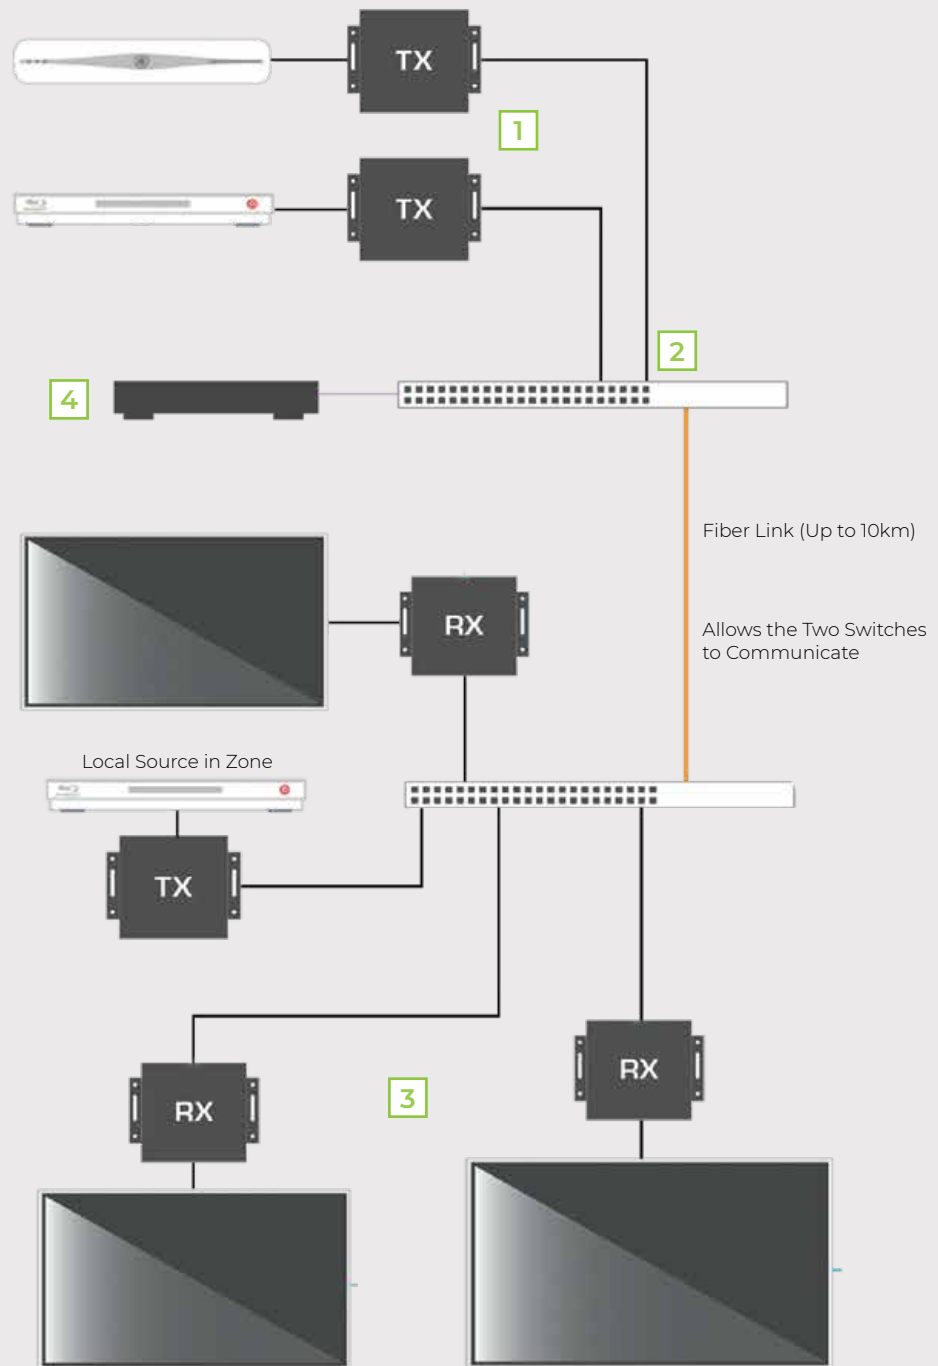

Our AV over IP products can also create stunning standard mosaic and artistic video walls and combine multiple video feeds onto a single screen.

Example Two: Video Wall with One Switch (3 Input & 11 Output)

All of the current HDMI over IP devices have a built-in video wall processor that allows you to build a **2x2 up to a 16x16 video wall**, and nearly any combination within that (i.e. 2x4, 6x2, 1x8).

Watch one source across a full video wall or use **single screen viewing mode** to make each screen show a different source.

Our **3G video tiler** pairs perfectly with our video walls for displaying even more video content in a quad view on one or more video wall screens.

EPIC MESH

The Epic Mesh solution combines the power of a Luxul wireless product with the ease of wireless mesh networking solutions, resulting in a reliable network comparable to those you've come to depend on from Luxul. Enjoy simple installation with the Easy Setup App on your iOS or Android smartphone.

Enjoy These Additional Features with the Luxul Epic Mesh Solution:

- High capacity bandwidth between nodes
- Specialised antenna design with beamforming for better device connectivity and speed
- Quick and simple setup using Easy Setup App
- Physical node placement assistance for optimal coverage

Specifications:

- Wave 2 MU-MIMO
- High capacity 5GHz (4x4) backhaul radio
- 2.4GHz and 5GHz (2x2) client connectivity radios
- Secure guest network

Epic Wireless Mesh Kit

MK-10

- Includes two interchangeable nodes (can be configured as a mesh router or mesh satellite node)

Epic Wireless Mesh Node

MN-10

- Can be used as router, satellite, or additional node for expansion (can be configured as a mesh router or mesh satellite node)

REMOTE ACCESS

Manage Your Luxul Networks... from Anywhere

With our new cloud management solution, you'll have access to your client's networks from anywhere at any time. Available through a web application as well as on Android and iOS smartphones and tablets, easily take advantage of all the benefits below and more:

- Reboot PoE and smart PDU connected devices
- Remote access to a device's local UI
- Automatically discover and monitor all devices on the network
- Receive alerts when devices go offline
- Remote firmware updates
- Easily view all your sites in either list or map view

Epic Routers

Luxul Epic routers are designed for use in high-capacity residential and commercial networks. A router is the interface between the internet and the local network and is the foundation for a reliable network. Luxul's complete line of full-featured, high-performance routers offer firewall, QoS, VLAN, VPN, and other capabilities that ensure the best network performance, scalability, and security.

WIRELESS ROUTERS

Luxul's line of wireless routers combine wired router functionality with high-powered, dual-band wireless technology. With support for firewall, QoS, VPN, and Roam Assist for active roaming and improved network performance, they're a great choice for highly-reliable residential or light-commercial networks.

Router Limits

Luxul routers with Router Limits content management* put your customers back in control of their internet experience. Manage the traffic, pause device access, track history, set scheduled access, and limit site access by groups or devices with internet connections.

Easily set, adjust, or create new restrictions from the cloud app, creating a seamless experience.

Luxul Easy Setup App

The Luxul Easy Setup App helps you be efficient on the job.

L2/L3 POE SWITCHES

Luxul AV Series switches feature rear-panel ports and front-facing LEDs (user-selectable blue/green colors) for clean integration with AV rack systems. Managed switches feature advanced Layer 2/Layer 3 functionality and are designed for use in HD over IP video systems; non-managed switches are plug-and-play.

48-Port Gb PoE+ L2 L3 Managed Switch with 4 SFP

SW-510-48P-F

- PoE Self-Healing with auto-recovery and power scheduling
- 48 PoE+ Gigabit Ports, 740 Watt total PoE budget
- Front-facing ports, 4 SFP (1Gb) Ports
- Rack Mountable

48-Port Gb PoE+ L2 L3 Managed Switch with 4 SFP+

SW-610-48P-F

- PoE Self-Healing with auto-recovery and power scheduling
- 48 PoE+ Gigabit Ports, 740 Watt total PoE budget
- Front-facing ports, 4 SFP+ Ports
- Uplinks aggregable up to 40Gbps, Rack Mountable

12-Port Gigabit Managed PoE+ Switch

XMS-1208P

- Eight Gigabit Ethernet PoE+ ports (130 Watts power budget)
- Two Gigabit Ethernet ports & two SFP ports (can be used independently)
- Fanless for silent operation

26-Port Gigabit Managed PoE+ Switch

XMS-2624P

- 26 Gigabit RJ-45 ports + two Gigabit combo ports
- 24 PoE+ ports (370 Watts power budget)
- Variable speed fan

AFFORDABLE SWITCHES

Based on the newest standards and highest-quality design, Luxul switches offer a scalable and affordable choice for expanding your network.

5-Port Mini Gigabit Switch

XGS-1005-5

- Five Gigabit RJ-45 ports
- 10Gbps switching capacity
- Designed for desktop or wall mount
- Five XGS-1005s sold in a package

8-Port Gigabit Desktop Switch

XGS-1008

SW-100-05PD

SW-100-08P

4 Port GB POE+ Switch

SW-100-04P

The SW-100-04P is a compact Gigabit PoE+ switch that provides four PoE+ capable ports of Gb Ethernet connectivity with a total power budget of 58 watts. It is an excellent choice for expanding your network when using PoE-enabled devices such as VoIP, IP cameras, and wireless access points and fits easily into the widest range of environments. The durable metal case includes rubber feet and keyhole features for surface mounting options.

- Connect up to 4 IP cameras or other PoE-enabled devices (max output 58 watts)
- Simplify PoE device installation, (IP cameras, VoIP devices, wireless APs)

Features

- 4 port Gb PoE+ switch w/ uplink - 58W total power budget
- Durable metal case
- Fanless for silent operation
- Includes keyhole features for surface mounting options
- Three-year limited warranty

5 Port GB MULTI-MOUNT Switch

SW-100-05PD

The SW-100-05PD is a 5 port PoE+ powered switch that is powered from a PoE+ switch or injector powered uplink and provides an additional four ports of Gb Ethernet connectivity. One of the Gb Ethernet ports allows the powering of a PoE 802.11af device (pass through port) such as a camera, control system interface, or AV over IP receiver. The durable metal enclosure includes detachable wing brackets for mounting and attachable magnet feet for easy mounting to metal surfaces.

- Connect up to four devices to the network without having to be plugged into a wall outlet
- Install into a wide range of environments

Features

- 5 port PoE+ powered unmanaged Gb switch with PoE pass through
- 1 port PoE+ powered (PoE PD) Gb ethernet port (30 watts required)
- 1 port capable of powering a PoE/802.11af device (15 watts maximum)
- Durable metal case
- Multiple mounting options
- Three-year limited warranty

8 Port GB POE+ Switch

SW-100-08P

The SW-100-08P is a 8 port PoE+ switch that is powered from a PoE+ switch or injector powered uplink and provides an additional four ports of Gb Ethernet connectivity. One of the Gb Ethernet ports allows the powering of a PoE 802.11af device (pass through port) such as a camera, control system interface, or AV over IP receiver. The durable metal enclosure includes detachable wing brackets for mounting and attachable magnet feet for easy mounting to metal surfaces.

- Connect up to four devices to the network without having to be plugged into a wall outlet
- Install into a wide range of environments

Features

- 8 port Gb PoE+ switch w/ uplink - 92W total power budget
- Durable compact metal case
- Fanless for silent operation
- Includes keyhole features for surface mounting options
- Three-year limited warranty

Luxul ProWatch FREE Cloud Management Solution

Luxul's new ProWatch cloud management solution allows integrators to remotely monitor and manage every device on their clients' networks, getting real-time notifications of status and quickly resolving issues. With cloud management, integrators can access their customers' Luxul networks and connected devices at any time — from anywhere — in map or list views via an intuitive web interface. Site-level indicators provide the online/offline status of connected devices and the availability of firmware updates, while customisable alerts notify integrators of issues via text or email. ProWatch will be available March 2020.

The Best Choice for Your Smart Home Network

With the dramatic increase in everyday connected devices, having a powerful network that manages the flow of audio, video, and data has become critical. With that in mind, Luxul:

- Is engineered specifically to support smart home technology networks that smoothly stream video for entertainment and security; audio for pitch-perfect sound; and accurate data for thermostats, shades, and lighting control.
- Is built for professional installers who know how to configure and optimise networks.
- Provides a network that can handle the everyday demand on bandwidth and is built with the horsepower to run today's technology and beyond.
- Wireless coverage everywhere you need it, with the ability to seamlessly move your device between Access Points without dropping off the network.

Warranty

Luxul offers free software updates plus a three-year hardware warranty on all Luxul network products when the network components are purchased from and installed by an Authorised Luxul Dealer.

Protection for your children while they use the Internet

Keep Your Children Safe

Take control of screen time, and safeguard your children against harmful content with Router Limits. Our children are becoming more and more connected to the Internet, which can pose a danger to them. Using Router Limits allows you to determine how much screen time your child has while governing what content comes into your home and what doesn't.

Manage Screen Time

Set Internet access schedules that fit the needs of each person. For example, filter social media for employees during the workday, or shut off the kids' access to the Internet completely during dinner and at bedtime.

Filter Content

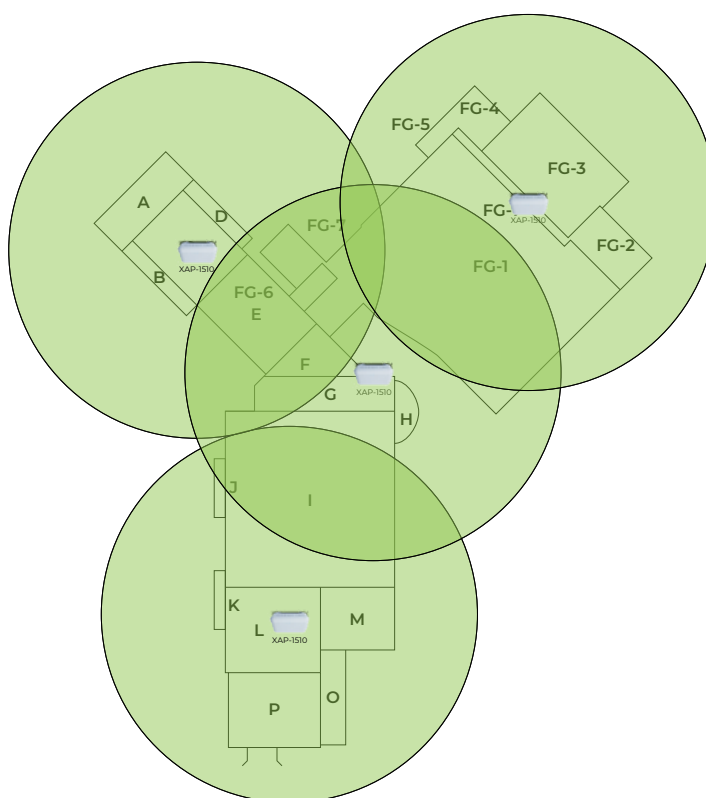

An extensive library of filters include categories like Games, Social Media, and Offensive Content, as well as popular sites and apps like Facebook, Netflix, and Snapchat. Filters can be customised to your exact needs.

Track Browsing History

View web use and browsing history data right at your fingertips. Now you can see what's happening on your network, even when you're not there.

Overview

NETGEAR's commitment to AV over IP includes a range of products and dedicated support services. Our M4250, M4300 and M4500 series of high-performance, flexible switches are engineered for AV over IP.

NETGEAR Business has led the way for 25 years by successfully enabling more than 50 million businesses worldwide. We stand behind our sales partners and their customers through our community and support systems.

The quality, reach, and value of our products and services is unmatched. NETGEAR Business means solutions that fit your needs and your budget. Our comprehensive portfolio of switches enables you to order exactly the combination of fiber or copper ports you need now with room to expand for the future. Providing the ability to connect any type of AV over IP device, NETGEAR switches offer you flexible speed options from 1 Gigabit up to 100 Gigabits per port!

Applications

Video over IP

NETGEAR recognises the explosion of video over Ethernet and has specifically designed products for AV over IP installations. From NETGEAR IGMP Plus™, which allows out-of-the-box functionality for most all multicast installations, to modular switches accommodating copper, fiber, and HDMI inputs, we will work with you to find the right solution at the right price.

The AV GUI on the M4250 series switches uses pre-configured profiles for specific types of AV over IP, like NDI5, NVX, AMX, SDVoE and many more.

Audio over IP

The Pro AV world has adopted IP as their delivery method of choice and NETGEAR is here to help. Our switches provide a range of sizes and mounting methods to accommodate any install - from the university campus to touring road show.

If you are using Dante or AVB/Milan devices in your audio deployment, you can trust that NETGEAR's Pro AV switches are designed to seamlessly integrate into your solution. Easy to use, easy to manage.

SECURITY SOLUTIONS FOR PROFESSIONALS

IC Realtime Products Are Professional Quality Equipment Made To Last

Established in 2006, IC Realtime has become a global innovator of video surveillance technology. We are a firm believer in that "How you do anything is how you do everything". And so every day, and in every way, we strive to be the standard by which others are measured.

As an industry leader, we have pioneered the introduction of the Cloud Video Recorder and the first in the surveillance camera sector to introduce a 360-degree X 360-degree device. IC Realtime is a

strong supporter of the new UL2802 performance testing standard for camera image quality. Our customer base includes Distribution & Strategic Partnerships, Security & A/V channel dealers, Industry Alliances and buying groups.

Today, we are more than excited to introduce you (or in some cases, reintroduce you) to the company that put seeing in realtime on the horizon, IC Realtime!

DESIGNER CAMERAS

Stand Out By Blending In

Let the IC Realtime security professionals customise your cameras and other products.

TAILOR MADE FOR EACH SITUATION

The Custom Advantage

For any professional that installs security and surveillance cameras as well as Architects and Designers. This level of custom "finishing touch" can be the attention to detail that helps win premium installation bids.

Cameras

DESIGNER CAMERAS

The Designer Line is a finish customisation process that can match, accent, or conceal video cameras and other visible accessories by matching them to their environment.

The Designer Line

Custom Tailored Cameras & Gear

Let the IC Realtime security professionals customise your cameras and other products. Cameras can be finished in any number of woodgrain, solid colours, and patterns with custom matching as an available option. The UV resistant coating also provides an extra layer of weather protection.

Bullet, turret, and dome camera housings are available right now with more to come. We can coat other products as well!

Let Us Design Your Project

Our Pro-Design Team can layout camera designs and help to eloquently compose job proposals.

1 Year Warranty

Security cameras come coated in a durable and protective finish protected by a 1 year warranty.

IP 180° & 360° SPHERICAL CAMERAS & MULTI-LENS CAMERAS

It's no secret that there's a need for wide coverage options ranging from 180-degree to 360-degree angles. IC Realtime debuts their new multisensor camera which will address affordability, quality, and situational coverage - all in a tidy package.

The flexibility to capture wide area footage is immense - and with 4 adjustable 2MP lenses, the camera replaces multiple single sensor cameras.

The unit is ideal for monitoring wide open spaces, building corners, parking lots and intersecting hallways. IR synchronicity - which adjusts in sync with the position of each sensor, produces clear imagery in total darkness.

THERMAL CAMERAS

IC Realtime's Thermal IP cameras offer dual lens solutions where thermal and visible video capture is desired. A perfect all-in-one indoor & outdoor solution monitoring in total darkness while retaining ability to confirm details.

In addition to built-in intelligent video analytics for detecting & analysing moving objects, these devices use uncooled VOx sensor technology that deliver constant performance at a cost effective figure.

WHAT IS DORI?

Detect, Observe, Recognise, Identify

DORI is a standard developed by the British Security Industry Association (BSIA) to define the level of detail a camera is capable of capturing. By using these PPM values, it is possible to select a specific camera sensor/lens combination and verify that it will provide the performance needed in each application.

Questions to Ask to Ensure the Best Technology is Used For Your Project:

1. What kind of camera are you using?
2. Where are you mounting the camera (first floor, second floor, rooftop etc)?
3. How far away from where the camera is mounted do you want to observe something and/or identify someone?
4. What will the lighting be in the location?

DORI Ratings

Ratings are expressed in Pixels Per Meter (PPM). The primary reference point used in most DORI explanations is a person's face. DORI ratings for each camera can be found on the ICR realtime website.

- Detection (25PPM)
- Observation (62PPM)
- Recognition (125PPM)
- Identification (250PPM)

Detection
25ppm

At the detection distance, an operator will be able to determine a human presence, although few details about that human will be visible

Observation
62ppm

At the observation distance, some characteristic details of the individual, such as distinctive clothing, can start to be seen.

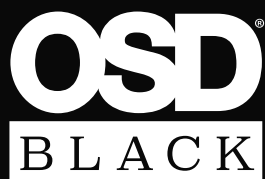

Recognition
125ppm

At this distance, verify with a high degree of certainty whether an individual shown is the same as someone you know. License plates also become legible at this distance under good conditions.

Identification
250ppm

The ability to positively identify a person beyond reasonable doubt. This level of detail provides sufficient image quality to identify an individual or clearly read a license plate.

MEET OSD BLACK

BLACK by Optimal Speaker Design is a range of premium quality flush-mount loudspeakers designed to serve discriminating homeowners and A/V integrators who demand the ultimate in aesthetic style and audio performance. BLACK products includes unique features and technologies that make them better looking, easier to install and more durable, while delivering lifelike sound quality more typically found in free-standing audiophile grade speakers.

There are BLACK models to fit every distributed audio and home theater application and space, offered in three performance levels: Acoustic, Performance and Reference. BLACK products are sold only through custom installation Audio Video specialist dealers in order to ensure proper system design, installation and total customer satisfaction.

THE OPTIMAL SPEAKER DESIGN HERITAGE

Businessman and lifelong audiophile Dave Chai, who was inspired to start a new audio company after he was frustrated in his search for high performance outdoor and built-in loudspeakers, formed OSD in 2003. Dave knew that by leveraging his close relationships with experienced audio engineering, product design and manufacturing resources he could bring better sounding, higher value audio products to the custom installation channel. The exceptional performance of BLACK products combined with Dave's dedication to real-time, person-to-person, expert technical support is a winning formula perfect for these times of change. BLACK SERIES is the ultimate expression of Dave's vision and dedication to better quality audio for all.

- Woofer: 6.5" Polypropylene Butyl Rubber
- Tweeter: 1/2" Silk Soft Dome Pivoting, 6dB Crossover
- Frequency Response: 60Hz - 20kHz
- Power: 100W
- Sensitivity: 86dB
- Impedance: 8 Ohm
- Diameter & Depth: 236 × 100 mm

R62

6.5 In-Ceiling Speakers with 1.0 Parachute Silk Dome Tweeter (Pair)

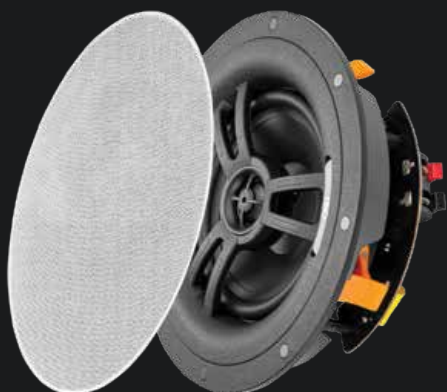

- Woofer: 6.5" Graphite W/ Rubber Surround
- Tweeter: 1" Pivoting CatEye Parachute Silk Soft Dome
- Freq Response: 40Hz-20k
- Power Handling: 120 Watts
- Sensitivity: 87 dB
- Impedance: 8 Ohm
- Dimensions: 236.2 × 99.8 mm

R63

6.5" In-Ceiling Speakers with 1.0" Aluminium Dome Tweeter (Pair)

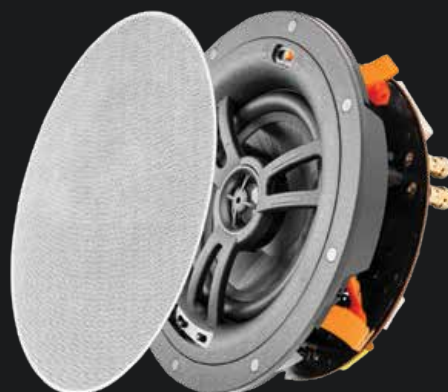

- Woofer: 6.5" Carbon Fiber W/ TPR Surround
- Tweeter: 1" Pivoting Ceramic Coated Aluminum Dome
- Freq Response: 38Hz-20k
- Power Handling: 150 Watts
- Sensitivity: 89 dB
- Impedance: 8 Ohm
- Dimensions: 236.2 × 99.8 mm

R61EZ

6.5" 2-Way In-Ceiling Speaker with Quick EZ Mounting System

- Power Handling: 100W Max
- Woofer: Polypropylene Cone
- Sensitivity: 88dB 1w/1m
- Tweeter: 1" Pivoting Soft Dome with Neodymium Magnet
- Freq Response: 60Hz - 20kHz
- EZ Mount System
- Perfect Edge™ Magnetic Grille
- Dimensions: 230 × 80 mm
- Cutout: 200 mm

R62EZ

6.5" 2-Way In-Ceiling Speaker with Quick EZ Mounting System

SUBWOOFERS

Rich Deep Sound

When you want incredible sound in your home, and an in-wall subwoofer is too invasive, your best choice is a stand-alone powered subwoofer speaker. Our selection of powered subwoofers will give you the rich, deep sound you want without the high cost of overpriced brands. You'll be able to use these subwoofers with virtually any home audio system, and do not require a separate amplifier. A subwoofer will ensure the clarity and detail of your favorite music comes through on each and every track. These subwoofers are an easy and affordable way to add gut-wrenching bass to home theaters, media rooms and gaming spaces.

OUTDOOR SPEAKER

Round out your whole house system with great outdoor sound from OSD's Black Series. The P-83 is a powerful outdoor speaker that delivers full-range audio in an all-weather design so you can enjoy high fidelity sound out on the patio, deck or backyard. This durable outdoor patio speaker is rated at 150W with plenty of power to spare to crank up the tunes without distortion at high volumes. Designed for outdoor conditions with weather-resistant components, sturdy ABS polymer enclosure and rust-resistant

grille, the P-83 serves up rich and fulfilling bass with an 8" injected polypropylene woofer as well as crisp highs with a 1" titanium dome tweeter. Frequency response ranges from 40Hz - 20kHz, so you'll experience a full-range of accurate sound that will truly enhance the listening enjoyment at your next party or BBQ. The P83 is easy to install and is ideal for patios and decks up to 800 square feet. For the best protection, we recommend installing these speakers in a covered area such as beneath eaves and overhangs.

P83 Black & P83 White

PERFECT EDGE™

Aesthetics

You would never notice an installed OSD loudspeaker, that is until you hear it.

All architectural speakers feature ample Neodymium Magnets. The grilles are low profile rust resistant white powder coated (paintable) Steel.

Magnetic edgeless installation, you would hardly know its there until its evoked emotion within you.

PERFECT EDGE™

BLACK in-wall and in-ceiling speakers perform a near miraculous disappearing act. Rather than a wide flange found on most built in speakers, BLACK speakers feature flange-free Perfect Edge™ magnetic grilles that minimise the visible footprint of the speaker for a clean, elegant and obtrusive appearance

MULTI-ZONE STREAMING

OSD Black Streaming

For customers ready to expand their whole-house audio system and enjoy wireless music streaming services, but who don't want to compromise sound quality, our SRT models are a simple way to get it done. Connect to any existing home theater AV receivers or Hi-Fi systems and delivers 24-bit audiophile-level sound.

BK-SRT4

4-Zone Wi-Fi Smart Media Server for Commercial & Residential

The SRT4 is a 4-zone Multimedia Audio Streaming Server that has you covered for both commercial and residential clients who want to stream and control audio in homes, restaurants, offices, gyms, or retail spaces without making the penny pinchers flinch. This feature-rich wireless streaming pre-amplifier connects and delivers 24-bit audiophile-level sound quality from a music library, Spotify, Napster, iTunes or iHeartRadio and can be used with Alexa to play other music sources or internet radio—all easily controlled with the free OSD Play App for smartphones or tablets.

NERO VOX

Easy Upgrade Docking Station

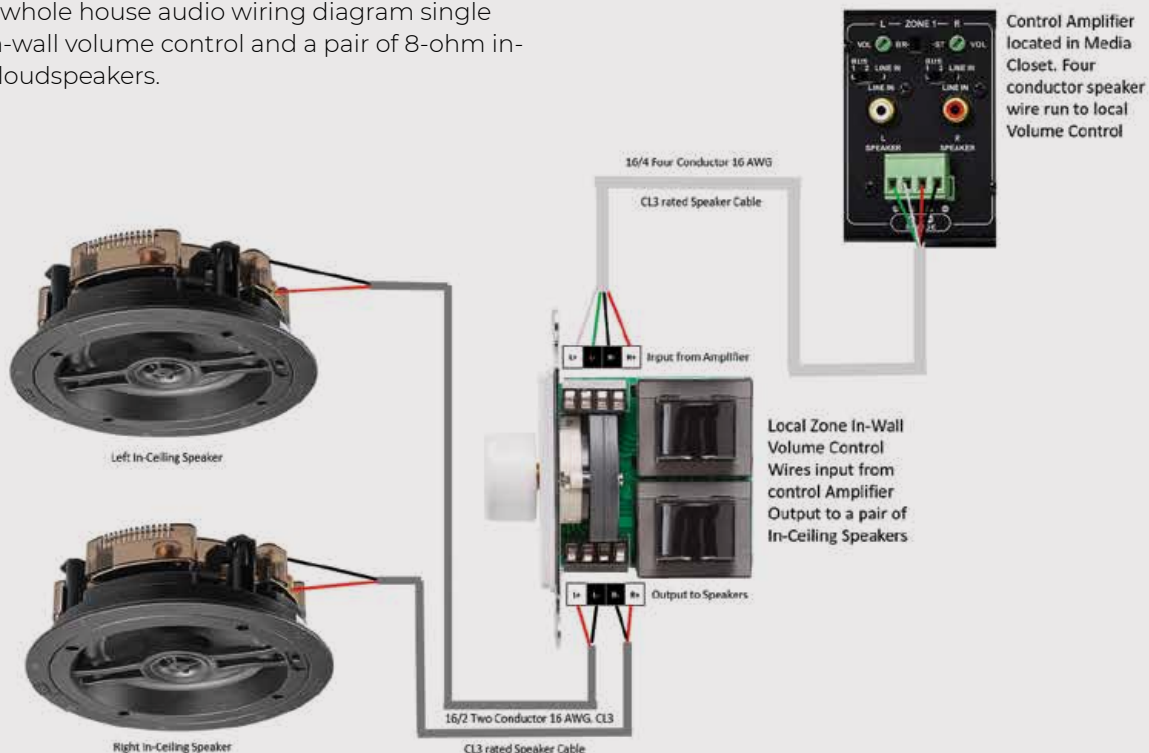

The NERO Vox is a Custom In-Wall Docking Station with internal 20W Class D Power Amplifier created exclusively for the Echo Dot 3rd. It provides a simple upgrade path for older VC or powered keypad (Abus) type systems that have stopped working or are simply outdated. Replace the VC's or keypads with our Nero Vox, add Echo Dots and use existing wiring to connect to the speakers and provide power. The speakers could also be upgraded as well. Using our Audio Input/Output and Power wall plate also allows you

to add a subwoofer. This is a big retro fit opportunity. The Alexa app allows you to create groups and sync music easily and of-course gives customers voice control.

New construction: Provides builders with a low cost solution for multi-room audio. No centralised amps or controllers.

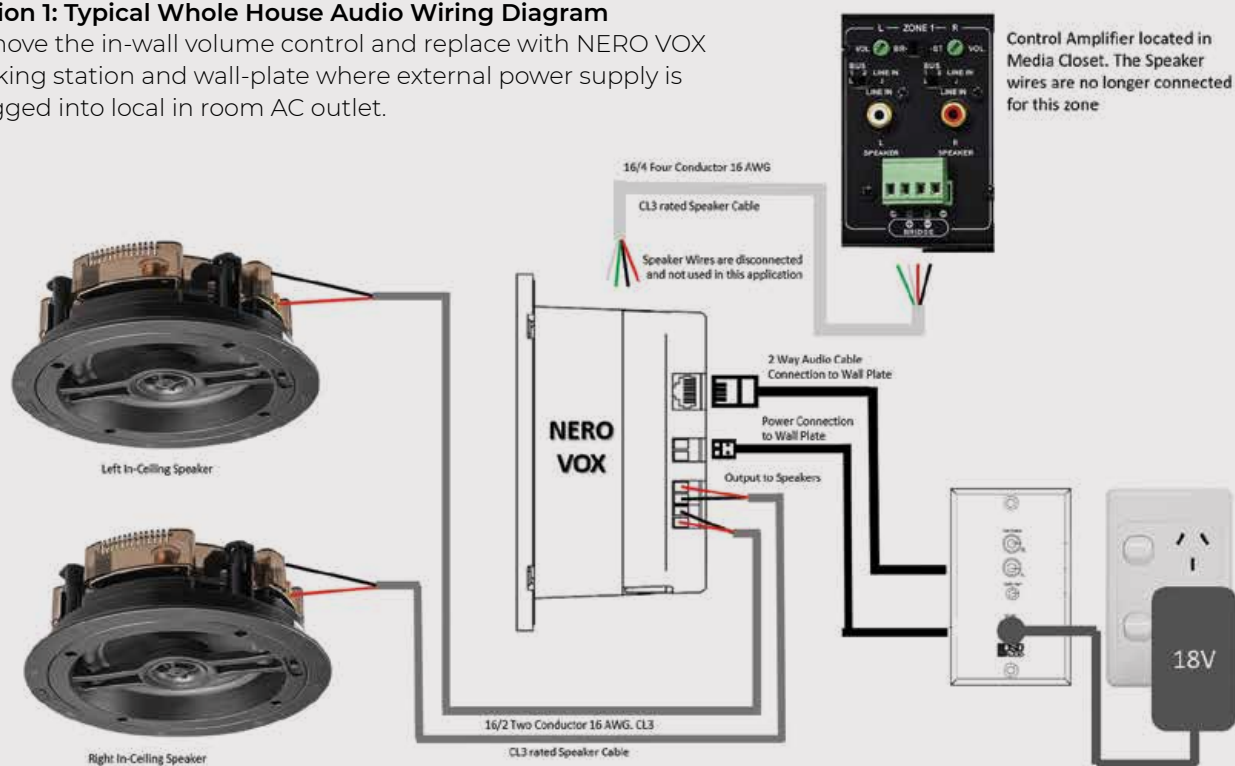

Installed alternative to a sound bar for improved TV sound. Install the Nero Vox next to a wall mounted TV, connect to TV to the audio input.

Typical whole house audio wiring diagram single zone, in-wall volume control and a pair of 8-ohm in-ceiling loudspeakers.

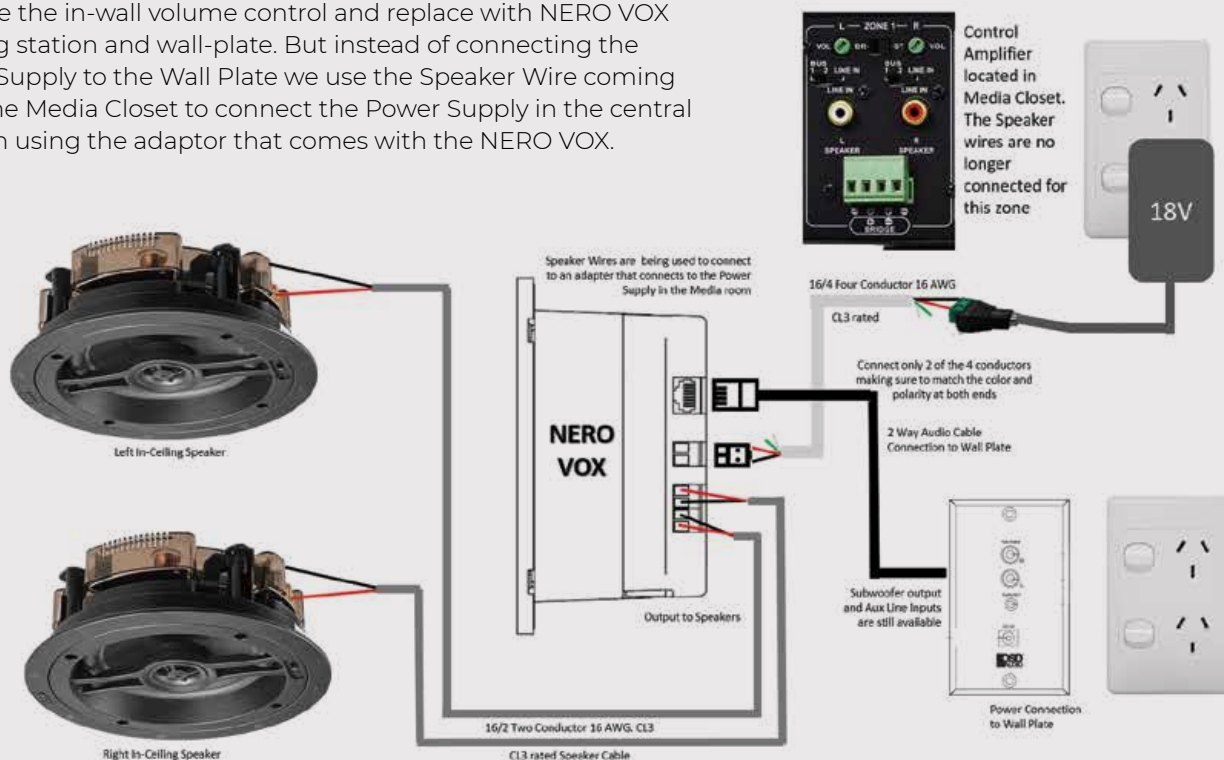

Option 1: Typical Whole House Audio Wiring Diagram

Remove the in-wall volume control and replace with NERO VOX docking station and wall-plate where external power supply is plugged into local in room AC outlet.

Option 2: Typical Whole House Audio Wiring Diagram

Remove the in-wall volume control and replace with NERO VOX docking station and wall-plate. But instead of connecting the Power Supply to the Wall Plate we use the Speaker Wire coming from the Media Closet to connect the Power Supply in the central location using the adaptor that comes with the NERO VOX.

VIVID audio®

PERFORMANCE. STYLE. DRAMA.

Our loudspeakers look, and sound, unlike any you've ever experienced before. From a blank sheet of paper to finished product, every Vivid Audio loudspeaker is created for a single purpose: to bring you perfectly transparent, natural sound, free from colour, resonance and reflection. Which means you get to enjoy the music you love in a whole new way: exactly as it was written, performed and intended to be heard. As an engineering-led company, we build our loudspeakers to rigorous technical standards, not price points. Whichever Vivid Audio speakers you choose, you'll benefit from the same world-class, handmade drivers, crossovers, enclosures and other technology. Whether you're a dedicated audiophile, discerning music lover, home entertainment aficionado, or someone who recognises, expects and demands only the very best, you'll find your perfect loudspeakers here.

4K HDR VIDEO MANAGEMENT SYSTEMS

The Best Video Viewing Experience...Ever

Zappiti video management systems are designed for those who want to watch movies as they were originally intended, in their uncompressed, high-resolution glory. In a world controlled by the rules of internet service providers, Zappiti delivers amazing

picture quality and the perpetual availability of content.

Regardless of the internet connection, you can enjoy Hi-Res and UHD HDR files instead of the compressed content delivered by streaming providers.

The Ultimate Media Center

With Zappiti, curating the ultimate media library is a breeze, as beautifully designed cover art and extensive movie information are automatically downloaded and sorted by category. The astonishing Zappiti user interface enables quick and easy navigation, with powerful sort and search functions, parental controls and unlimited custom collections.

EXPERIENCE 4K MEDIA BLISS

Zappiti designs and manufactures only professional grade Video Management Systems; delivering the highest quality video, combined with superior performance for the best possible user experience.

If you don't own an Ultra HD 4K display, No problem! Zappiti Magic Pixel converts Ultra HD video content into extremely high quality 1080p uncompressed 4:4:4 video to enable 4K content on 1080p displays.

Zappiti MagicPixel V3

Forget expensive outboard video processors!

Zappiti Players incorporate Zappiti™ MagicPixel technology for outstanding picture quality with better upscaling (up to 4K resolution), improved dynamics, accurate colorimetry, deeper contrast, and solid deinterlacing.

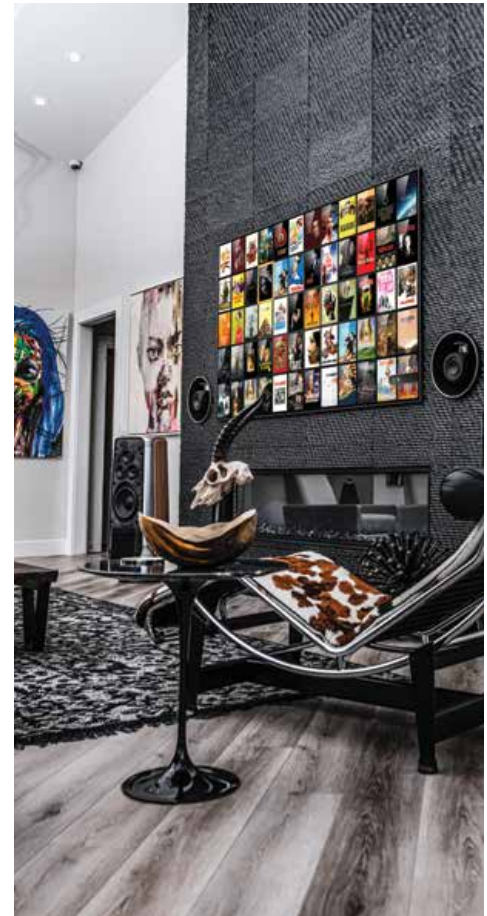

Don't worry if you don't have an Ultra HD 4K display! Zappiti MagicPixel technology converts 4K Ultra HD content into extremely high-quality 1080p uncompressed 4:4:4 video for Full HD 1080p displays and projectors.

ZAPPITI NAS RIP 4K HDR

Back-up Your Video Library and Enjoy Them in Every Room of Your Home

The ultimate solution for distributing multi-room audio and video throughout a home. With high performance video processing technology and a rich media center application, the Zappiti NAS Rip 4K HDR enables users to build their video library quickly and easily.

Rip with the Touch of a Button

The Zappiti NAS Rip was designed from the ground up to store movies quickly and reliably on a hard disk drive array without compression or loss of quality. Open the tray of the Blu-ray player, insert your disc, and that's it! Zappiti NAS Rip does all the work! Once your disc is ripped and saved in the internal storage, it is ejected and you can simply insert another one.

Zappiti NAS Rip 4K HDR

- 8 Bay hard drive capacity allows easy library expansion.
- Rips DVD, Blu-ray, Blu-ray 3D, 4k UHD discs and CDs.
- RAID-5 disk storage provides ultimate backup protection.
- Supports multiple NAS servers for incredible scalability.
- Enables multi-room video via Zappiti Players.
- Embedded Zappiti Remote Server Monitoring technology.
- Plug-n-play network and Zappiti player configuration.

ZAPPITI SHARE

Multi-Zone Streaming & Video Processing

With Zappiti Share you can stream video files stored on the internal (or external) hard drive to other Zappiti media players over the home network. Playback up to 4 files at the same time in different rooms in Blu-ray quality! (2 in UHD quality).

Add a Zappiti NAS Rip 4K HDR to the system and you can enjoy movies and TV shows in Blu-ray quality in up to 8 zones simultaneously (up to 10 zones in UHD quality). Each player operates independently so you can watch different movies in different rooms of your home.

Hey Google, what song is playing in the Family Room?

Sample Set Up of an MBX Home System

- A Wired MBX-AMP set up in the kitchen with an XTSPiPlus**
 - Use the XTSPiPlus for whole home audio control. This stylish in-wall touchscreen runs an embedded version of the MyRussound App.
- B Using Wi-Fi, connect an MBX-AMP in the bedroom and use the free MyRussound App to control speakers**
 - Download the free app from the iOS/Android app store to control the music playing through your speakers.
 - With the app you are able to easily group multiple rooms together.
- C Using Wi-Fi, connect an MBX-AMP in the office for control of in-ceiling speakers**
 - Use the simple buttons on the front of the MBX-AMP to control the music without requiring your phone or any other device.
- D MBX-PRE connected to an MCA-66 or MCA-88 in the den**
 - An MBX-PRE can be easily added to an existing Russound system already in place. This is the preferred dedicated streaming audio source for these products.
- E Wired MBX-AMP in the living room connected to the TV**
 - The advanced TV integration features enable the MBX-AMP to share speakers between your TV and your audio system easily without any additional hardware or control system. Just use the included Infrared Sensor and quickly teach the MBX-AMP your remote control's volume and mute commands. It's that easy.
 - Expand the system using Chromecast Built-In to easily add a soundbar to the system or a device such as the Google Home Mini to add voice control capabilities to the system.

SOURCES FOR ADVANCED CONTROLLERS

BTC-1X Bluetooth® Remote Transceiver

Simply plug the BTC-1X into the Bluetooth input of any Russound Bluetooth ready controller (such as MCA-88 or MCA-66) to add Bluetooth streaming audio. Remote transceiver allows for optimum placement via CAT-5 wire up to 300' (91.4m). High quality audio codec featuring aptX® for superior Bluetooth audio quality. Micro-USB programming cable is included.

BSK-1 Bluetooth® Source Kit

The BSK-1 Bluetooth Source Kit permits Bluetooth enabled devices to stream content to any audio system for wireless audio. It offers a remotely located Bluetooth receiver, optimised for ideal placement and range by the custom installer. The receiver is connected with CAT-5 wire and may be extended up to 300' (91.4m)

Applications for BSK-1 Kit:

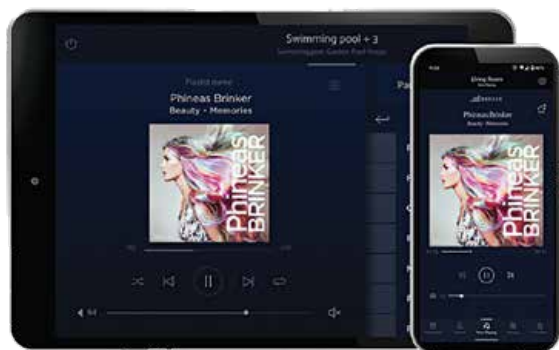

- Bluetooth audio solution for any audio system
- Integrating Bluetooth into a Russound CA4 or CAA66 systems
- When adding additional Bluetooth inputs to a Russound MCA-Series system

ST1 Smart Tuner

The ST1 is a single AM/FM tuner with RDS. Works with MCA-Series controllers. 6 banks of 6 presets. Half rack width for side by side installation. Built-in 110-240V AC power supply. Rack-mount ears included.

ADVANCED MULTI-ZONE SYSTEM CONTROL

Russound App

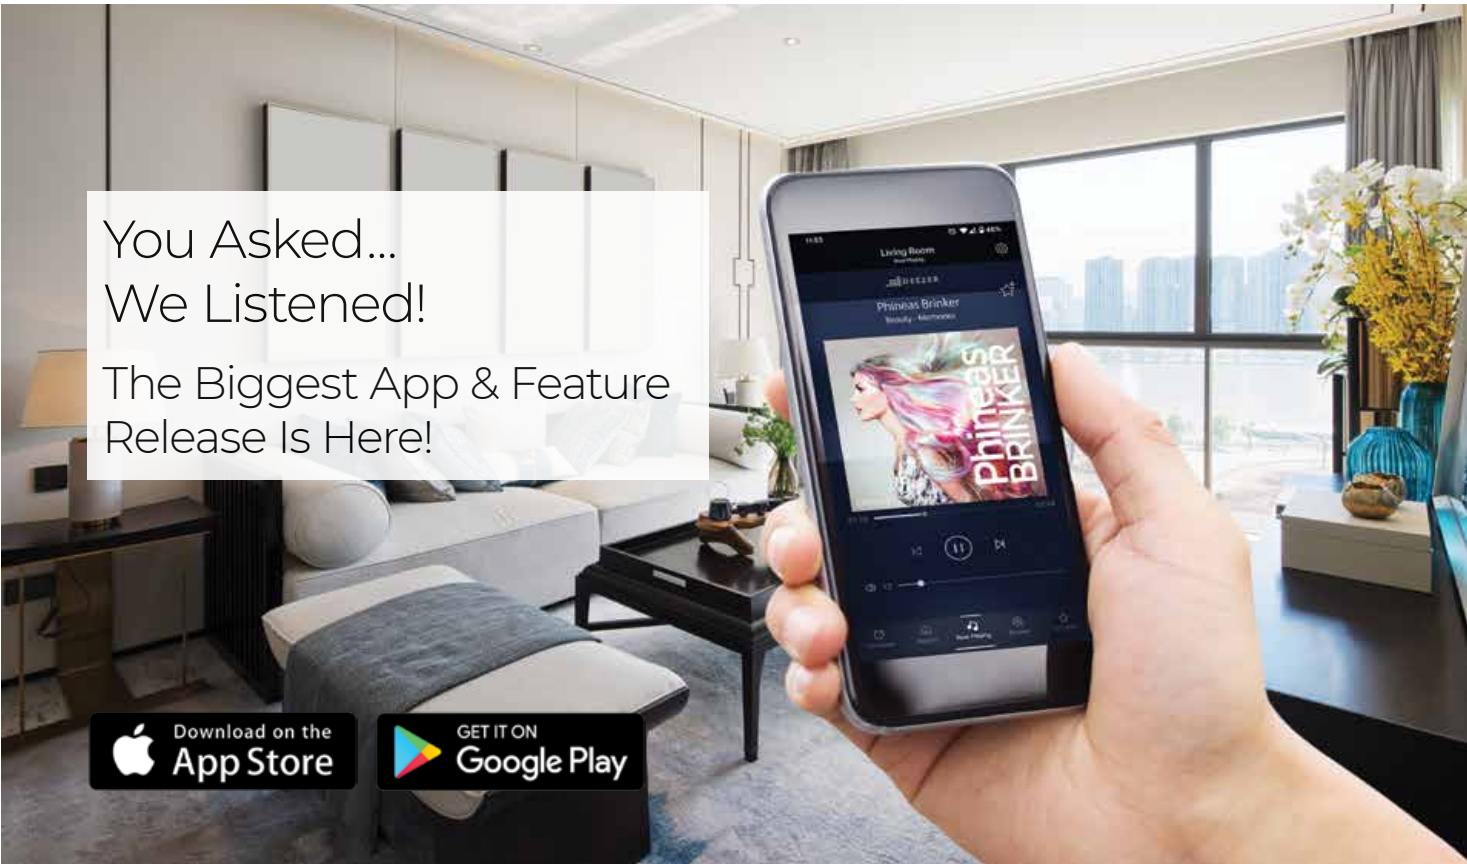

Control your Russound XStream, MCA, MBX or XZone Series and all connected sources from the comfort of your iPad, iPhone, iPod touch or Android device. The Russound App offers seamless integration and effortless control for compatible Russound systems. Simply download the Russound App from the iTunes store or Google Play store.

MyRussound is only compatible with the MBX-AMP, MBX-PRE, MCA-66, MCA-88, MCA-88x, MCA-C3 and MCA-C5 controllers and the XStream Series products: XSource, XZone70V and the XZone4.

- Auto-discovery of Russound devices on the network
- Intuitive control of any zone in a system
- Source metadata including Album Art for compatible sources
- Easy Content browsing

ADVANCED MULTI-ZONE SYSTEM CONTROL

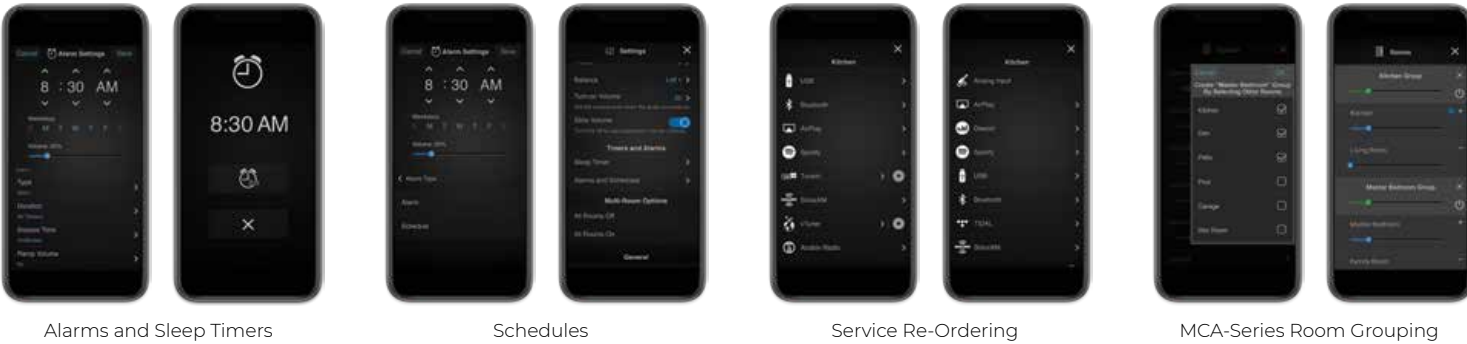

The new Alarms, Schedules, and Sleep Timer Features offer a new level of functionality and enjoyment for a Russound audio system. The full functionality is available for use with the MBX-Series from Russound and offers multiple alarm tones/chimes as options in addition to a user's favorite music stored as any Russound Favorite. When an MBX-PRE is used in Source Mode for an MCA-Series controller, this functionality is extended to work with any zone of the controller.

Existing alarm functionality for an MCA-Series controller without an MBX-PRE as a source is also significantly enhanced with the addition of scheduling features and with up to 15 alarms and schedules now being made available for each zone but no source of chimes/tones would be available for their use for alarms. To get the

full benefit and features available, Russound recommends using at least one MBX-PRE streamer with every MCA Series installation.

Service Re-ordering/Exclusion is for MBX-Series devices so that menu navigation can be simplified with the most used services organised in a customer's preferred order and with unused services even hidden entirely from view.

The new MCA Grouping update is a significant enhancement to allow quick and easy groupings of rooms/zones on an MCA-Series controller. These groups are persistent and will stay grouped until the user stops the group or removes any individual rooms from the grouping as desired. Grouping rooms almost instantly is now simple and intuitive for any user.

PROFESSIONAL TWO-CHANNEL AMPLIFIERS

D250LS 2-Channel Digital Amplifier

Auto-sensing enables localised speaker override for a connected peripheral, such as a TV or PC. Rated 50W/channel RMS at 8 ohms or 75W/channel RMS at 4 ohms. The bridgeable power setting combines channel power for 125W into a single 8-ohm load, 1U 1/2 rack chassis has three mounting options (included).

A2100 Digital Amplifier

The powerful 100W/channel class D amplifier in the A2100 is combined with features such as 12v trigger control, audio sensing, volume gain adjustment, and a buffered line output that enables even more amplification of the same audio signal when needed. 1U 1/2 rack chassis has three mounting options (included).

TV AMPLIFIERS

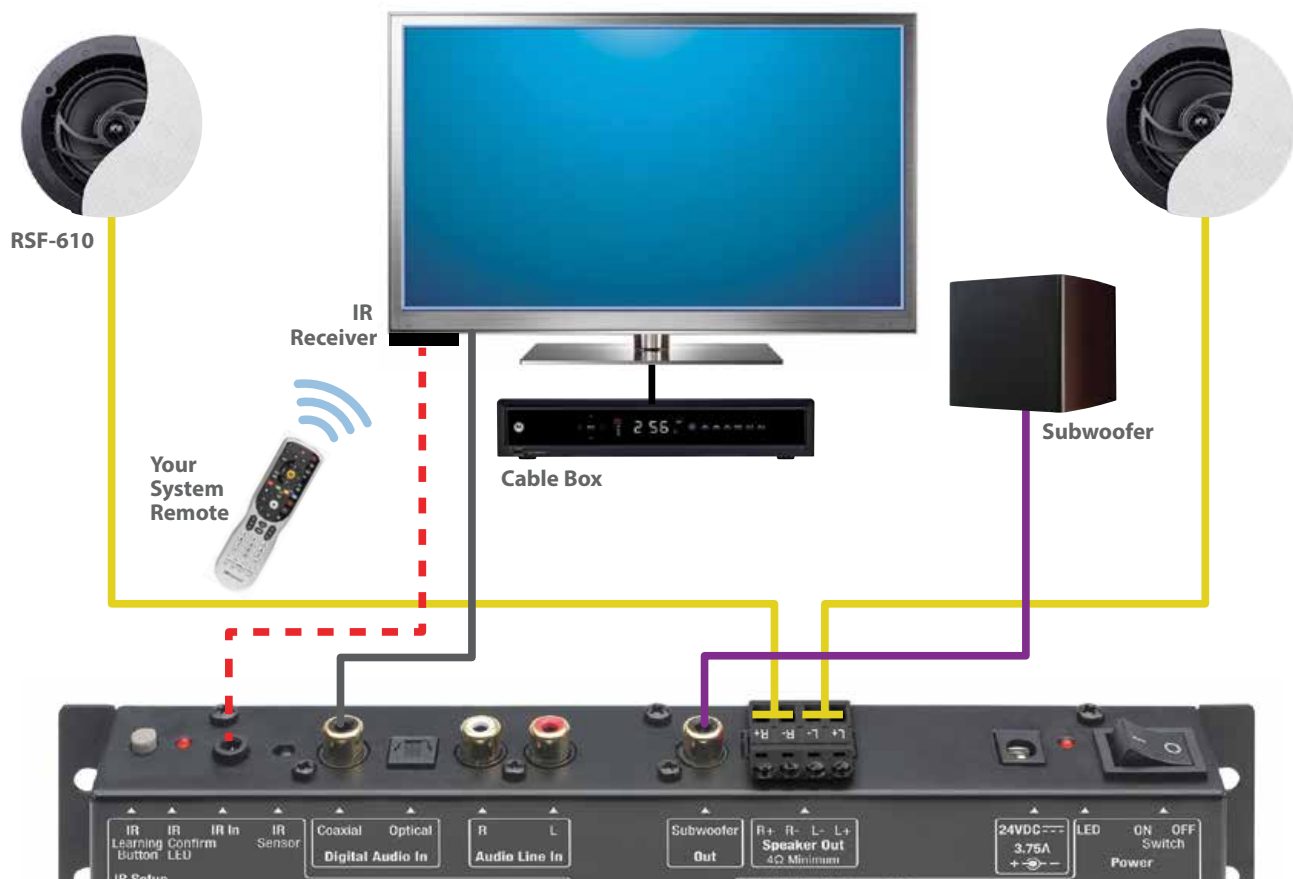

“The Russound [TVA2.1] is solidly built, it offers all of the features needed to power a pair of speakers, and it sounds clear and robust. Because of its size I was also able to neatly tuck the amp into a TV stand without it looking out of place”

— Robert Archer, CePro

TVA2.1 Digital Two-Channel TV Amplifier with IR Learning and Sub Out

Designed expressly for integrating with flat panel televisions, the TVA2.1 delivers smooth, robust sound for an enhanced viewing experience. On-board IR learning allows its volume to be seamlessly controlled by the TV or cable box's remote control.

- 35W/ch for enhanced TV audio
- Easily mounts behind TVs or in structured wiring cans
- 24-bit/96kHz S/PDIF; optical and analog line-level inputs
- Includes SLM-1 Slim Surface Mount IR Receiver
- IR learning for use with virtually any remote control
- Integrated Subwoofer output
